1 Executive Summary

Gravity Unleashed B.V. (GRAVITYUNLEASHED), a company incorporated under the laws of Curaçao is seeking a secure datacenter to host some critical IT applications. The primary choice is a secure, cloud-based, fully virtualized infrastructure as a service environment to which their offices can safely connect. Capital investment plays a factor, as there is a need to ensure future IT endeavors are both efficient and cost-effective.

GRAVITYUNLEASHED will not need to make any capital investments, as the scalable Blue NAP Americas (BNA) pay-as-you-go solution is based on fixed monthly fees. BNA's highly reliable and secure Tier-IV datacenter facility and solutions offer increased performance, cutting-edge technologies, and the added benefit to clients of potentially reducing and/or controlling operational costs.

The proposed solution will be deployed on BNA's, dynamically scalable, unified cloud-computing platform. Using BNA's cloud technology simplifies the process of configuring, ordering, installing, and maintaining computing resources. Optional features include centralized backup, storage, memory, and on-demand bandwidth allocation in a highly secure environment. With our optional Managed Services solution, we can monitor and manage your virtual nodes 24/7, allowing you and your IT team to focus on more important matters.

The BNA solution has been designed according to the technical specifications and requirements discussed with GRAVITYUNLEASHED and includes the following turnkey components:

1. Private Cloud infrastructure on the IBM VersaStack™ environment, through an Infrastructure-as-a-Service (IaaS) deployment.

2 Technical Requirements

GRAVITYUNLEASHED's main goal is to host their critical IT environment in a Virtual Server in a Tier-IV Certified datacenter in Curacao.

The specific technical requirements are summarized as follows:

Virtual Server:

- vCPU: 2
- vRAM (GB): 2
- vDisk (GB): 256
- IP Bandwidth: 2 Mbps
