Code of Conduct

Responsible Gaming 2022

CURAÇAO EGAMING,

In view of the Directive (EU) 2014/65 of the European Parliament and of the Council of 3 January 2018 (“Marketing in Financial Instruments Directive II” or: “MiFID”),

In view of regulation (EU) 2016/679 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (“GDPR”),

In view of the Directive (EU) 2018/1673 of the European Parliament and of the Council of 23 October 2018 on combating money laundering by criminal law (“6AMLD”),

WHEREAS,

- (1) To date October 21st, 1954, the Charter for the Kingdom of the Netherlands (the: “Charter”) was adopted, arranging for the independence of the countries within the Kingdom of the Netherlands.
- (2) To date June 8th, 1993 the national ordinance on offshore games of chance was adopted, pertaining to the exploitation of games of chance on the international market by means of service line services and amending the Criminal Code of the Netherlands Antilles (“Ordinance OGC 1993”).
- (3) To date July 13th, 2009, the Minister of Justice has requested Curaçao eGaming (“CEG”) to under its license within the meaning of Article 1, first paragraph of the Ordinance OGC 1993 supervise the responsible offering by third parties of games of chance to international end users via the internet by means of a non-exclusive Information Provider Agreement,
- (4) To date October 10th, 2010, the Charter was amended, granting Curaçao its autonomy as an independent country within the Kingdom of the Netherlands.
- (5) To date May 25th, 2018, the GDPR has been implemented in the Netherlands General Ordinance on Data Protection (“GODP”), introducing safeguards for the benefit of protection of personal data, such as however not limited to article 46, GDPR, restricting the transfer of data to third parties and countries.
- (6) To date October 23st, 2018, 6AMLD was adopted, enhancing the global standard in the field of combating money laundering offences.
- (7) To date May 21st, 2020, the Netherlands has implemented the fifth Anti-Money Laundering Directive (EU) 2018/843 (“5AMLD”) in the Netherlands Money Laundering and Terrorist Financing Prevention Act (“MLtPa” or: “Wwft”). It failed to timely implement 6AMLD.

- (8) On November 2nd, 2020 the Netherlands proposed to Curaçao in accordance with article 38(1) of the Charter, an agreement and executive agenda (“Landspakket”, “Executive Agenda”) providing conditions for financial assistance pertaining to the pandemic. It has been heavily criticized by the Advisory Department of the Council of State as a breach of the principles of independence of Curaçao in accordance with the Charter.
- (9) On January 10th, 2021 in preparation of the fourth round of Anti-Money Laundering/Combating the Financing of Terrorism Mutual Evaluations (“AML/CFT”, “MEval”), the Financial Action Task Force (“FATF”) published an update on its methodology for assessing compliance with the FATF Recommendations and the effectiveness of AML/CFT systems. With a focus on effectiveness and technical compliance, a country must demonstrate that, in the context of the risks it is exposed to, its participants collectively form an effective framework to protect the financial system from abuse. On 25 June 2021, the FATF placed Malta under enhanced surveillance due to increased and ongoing money laundering and terrorist financing risks in that jurisdiction.
- (10) On November 4th 2021, over 135 countries and jurisdictions adopted the Base Erosion and Profit Shifting package (“BEPS”), as proposed by the Organization for Economic Co-operation and Development (“OECD”). BEPS includes measures to tackle hybrid mismatch arrangements, the abuse of treaties, the artificial evasion of qualification as a permanent establishment and to improve the processes of dispute resolution. For the implementation of the multilateral agreements, BEPS calls upon the participation of the international business communities.
- (11) To date February 24th, 2022, the invasion of Ukraine caused significant economic disruptions of the service industry in Ukraine, catering to the international gaming industry. These disruptions have caused an urgent need, in the light of MEval, to take additional measures for AML/CFT purposes, including however not limited to an evaluation and mitigation of any influence exerted, directly or indirectly via nominees or advisors, by Politically Exposed Persons (“PEP”), specifically connected in any way or form to the Russian Federation.
- (12) To date August 29th, 2022, the Board of Financial Supervision of Curaçao and Sint Maarten (“Cft Curaçao and Sint Maarten”) has warned the minister of Finance that the proposed replacement (“Landsverordening op de Kansspelen” or: “LOK”) of several ordinances including the Ordinance OGC 1993 shall in all probability not be in financial compliance with measure H.2 of the Executive Agenda. It is therefore deemed highly likely that the said proposal shall have a negative impact on the principles of effectiveness and technical compliance with reference to MEval.
- (13) On September 26th, 2022 the minister of Finance has announced that the said proposal has been further delayed, causing additional concern that the proposal LOK is not up

to industry standards, potentially bringing great harm to the economy of Curaçao. The said proposal has not been updated since it was first proposed by the Netherlands in the execution of H.2 of the Executive Agenda. LOK does not seem to include any measures designed to tackle advanced forms of fraud and is not tailored to effectively protect personal data with GDPR, making the gaming industry of Curaçao vulnerable to the abuse of such data.

- (14) The industry stakeholders have not received any updates on the said proposal since March 4th, 2022. In comparison, the Netherlands Remote Gambling Act was submitted to the Netherlands parliament for approval on July 18th, 2014. It was only after seven years that on October 1st, 2021, a heavily amended version came into effect. It is therefore highly unlikely that the Netherlands will be able to adequately revise its proposal for the Curaçao gaming industry to comply with H.2 of the Executive Agenda and the principles of MEval within the designated timeframe as suggested by MEval. Additionally, there are significant concerns that the said proposal shall not be compliant with the principles of autonomy and independence of Curaçao in accordance with the Charter.
- (15) To date August 12th, 2022 the ministry of Finance has suggested the introduction of additional last-minute substance requirements for the gaming industry in Curaçao. Since that time, no updates have been provided. No updates on any topic have been reported by designated participants within the AML/CFT framework such as however not limited to the Financial Intelligence Unit (“FIU”) of Curaçao and the Stichting Gaming Control Board (“GCB”) in the preparation of the execution of any obligatory duties within such framework, such as however not limited to expanding staff, setting up educational programs or setting guidelines. This may potentially lead to the practice of fronting by such participants, which is highly undesirable from the perspective of AML/CFT.
- (16) The gaming industry of Curacao is one of the most important lifelines, with potential for further growth, for the economy of Curacao, the development of knowledge and experience, local employment, infrastructure and trust sector. Partly in order to maintain its global competitive position, it must be protected against economic damage as a result of failure to guide, either by third countries or by its own government, the continuous process of development of the AML/CFT framework. Therefore, CEG as a participant within the said regulatory framework has taken the initiative to present via its Code of Conduct Responsible Gaming 2022 (“CCRG 2022”) guidelines for the detection and mitigation of unusual behaviour for AML/CFT purposes by industry stakeholders. Such efforts are part of CEG’s continuous aim to enhance the effectiveness and technical compliance of the framework, with reference to MEval as well as the aim to protect the local economy, national and international service providers as well as end users.

- (17) The CCRG 2022 is designed as a prelude to the introduction of the national Ordinance “Gatekeeper” (“Poortwachter”), that has been designed by several stakeholders as an alternative to the current, outdated proposal “LOK”. It may serve to further enhance the effectiveness of the current framework with reference to MEval .

NOW THEREFORE HAS DETERMINED AS FOLLOWS,
