Re: Mathematical Analysis of *Chinese New Year 2, Cowboys, Lucky Fortunes, Golden Genie, Night Market*

File Number: MA-00-WNT-24-01

Dear Ms. Chen,

As per WisInNet Technologies B.V.'s request, please find **Gaming Laboratories International, LLC's (GLI)** math analysis for the following video reel games:

1. *Chinese New Year 2*
2. *Cowboys*
3. *Lucky Fortunes*
4. *Golden Genie*
5. *Night Market*

This report only verifies the mathematical aspects of these games and DOES NOT offer an opinion as to whether or not these games are currently authorized for use in any jurisdiction.

Game Description

All 5 themes in this submission are slot games.

Chinese New Year 2 is a 5-reel, 3-row, ways game with scatter-triggered Free Games. The Free Games offer the player a choice of five game options with differing numbers of spins and potential Multiplier values. The multiplier applies to all wins on screen during those games and may increase when the Free Games are retriggered. Free Games can retrigger for up to a 72x multiplier and a total of 100 games. The player may also play the extra bet at 1.5x their original bet. When the extra bet is active, the chance of entering the Free Games is increased by 100%.

Lucky Fortunes is a 5-reel, 3-row, ways game with scatter-triggered Free Games, Lucky Fortunes feature, and Bonus pick game. Playing at a higher bet unlocks more jackpots. The Wild symbol may trigger the Bonus pick game. Turn over 3 identical prizes to win. If the prize was unlocked, it is awarded. Obtaining six Red scatters triggers a pick to trigger the Free Games or Lucky Fortunes features. Obtaining three Gold scatters also triggers the Free Games. During the Free Games, when Gold Scatter appears on screen, Gold Scatter points are accumulated. An additional prize is awarded at the end of the Free Games based on the Gold Scatter points accumulated. During the Lucky Fortunes feature, Gold Scatter and Green Scatter lock on the reels until the end of the feature. When Gold Scatter and Green Scatter land on the reels, points are accumulated. A full screen of scatters awards an additional Full Reel Bonus.

Cowboys is a 5-reel, 3-row, 15-line game with cascading wins, combo-triggered Free Games, and a scatter-triggered Bonus Game. When wins are found on screen, those symbols are removed and new symbols replace them, this process repeats until no more wins can be formed. Obtaining 4 or more cascades triggers the Free Games. The Free Games cannot be retriggered, but the Bonus Game can be triggered from the Free Games. Obtaining 3 Bonus scatters in the base game or Free Games triggers the Bonus Game. In the Bonus Game, select one of three Question marks to get a prize.

Night Market is a 5-reel, 3-row, ways game with scatter-triggered Free Games. The starting multiplier, multiplier increase, and multiplier maximum for the Free Games depends on the triggering number of scatters. Each Free Game, the multiplier increases automatically. Free Games can retrigger for a total of 50 games.

Golden Genie is a 6-reel, 6-row, ways game with cascading wins, multiplied prizes, special wild feature, and scatter-triggered Free Games. When wins are found on screen, those symbols are removed and replaced with new symbols, this process repeats until no more wins can be formed. Any symbol on reels 2-4 may be wrapped by a silver box. If a win passes through the silver box, the multiplier for subsequent wins that spin is increased by 2x, and then the symbol changes to a different one with a gold box. If a win passes through the gold box, the multiplier for subsequent wins that spin is increased by 3x, and then the symbol changes to a wild. The multiplier resets to 1x when there are no wins on screen. The multiplier during the Free Games starts at 2x. Each winning screen increases the multiplier depending on whether a box is used: using a gold box increases the multiplier by 3x, using a silver box increases the multiplier by 2x, and using no box increases the multiplier by 1x. The Free Games multiplier resets at the end of the feature. Free Games can be retriggered for up to a total of 50 games.

Mathematical Analysis

A simulation was used to analyze the return for each of the five themes.

Summary

Based on the results of our simulation, GLI agrees with the manufacturer's reported RTPs for these themes in Table 1.

Table 1. RTP Summary
