

Information Security Policy

Fournine Technology N.V. is committed to the continual improvement within our Information Security system and to comply with the requirements of ISO 27001:2022 for Design, development, and management of online casino games.

Our intent is to provide the highest standard for Information Security relating to all data and information pertaining all stakeholders within the organization.

We are committed to satisfy all applicable requirements relating to the Information Security Management System and have the mechanisms and structures in place to continually evaluate the Management System to seek areas for continual improvement.

Fournine Technology N.V. has implemented the policies and procedures to effectively evaluate the risks relevant for its Information Security Management System. Moreover, we are committed to take the actions required to apply the treatments mentioned in Annex A of the ISO 27001:2022 standard.

We recognize that the Information Security of our products depends on the everyday actions of those in working within the teams of Fournine Technology N.V.. We are all committed to communicate with all stakeholders their roles within the company's management system, and to developing our personnel's skills through training and mentoring in both their professional and vocational interests.
