Conclusion:	Pass
BMM Reference Number:	RES-OL.1001
Consultant(s):	Chetan, Josep Rojas, Miguel Oliveira

1. PURPOSE.

Manufacturer requested BMM Spain Testlabs s.l.u to evaluate Mines v1.0.0 for satisfactory operation in the relevant Casino markets and other GLI 11 Standard Casino markets.

2. GAME CHARACTERISTICS.

2.1. Mines

The game is an Instant win game. To win, the player needs to open cells with gems, the more open gems the bigger the win. when the spider symbol appears in the game ends and zero win is awarded.

The game lets the player Choose the number of spiders from 1 to 24 in the game menu. This choice influences game odds and the bet multiplier. Spider positions are randomly assigned.

To start the game round, then by pressing the PLAY button in the game menu. The player begins opening cells one by one until encountering a spider. If a cell with a spider is opened, the player loses if all the cells without a Spider open player Win.

3. BMM EVALUATION PERFORMED.

BMM Spain Testlabs s.l.u has tested and confirmed compliance of the Mines v1.0.0 against the appropriate technical requirements specified in GLI-19 V3.0 for operation in the relevant Casino markets. BMM performed the following tests to confirm compliance to the relevant regulatory specifications:

SOFTWARE

3.1. Software Evaluation

This test is performed to review the following in the submitted source code: Game result determination, base/feature/double up etc., game fairness, game pay tables, game metering, use of critical memory and integrity checks, processors for peripheral devices, metering / accounting / audit functions, communication protocol, error handling, etc. Testing was conducted in accordance with the test plans using the relevant checklist6 to confirm conformance to the relevant requirements specified in GLI-19 v3.0.

3.2. Artwork Verification

Artwork was evaluated to ensure that it correctly explains the game rules and payout as specified in the technical documentation supplied by the manufacturer and that it conforms to the requirements specified in GLI-19 v3.0 standards.

3.3. Mathematical Evaluation

This test is performed to verify that the theoretical return of the game is as specified in the technical documentation supplied by the manufacturer and meets the requirements specified in GLI-19 v3.0 standards.

4. RECOMMENDATION.

Mines	1	96.00%	96.80%	96.00%	96.00%	96.00%

(*) Denotes items under test

5. ADDITIONAL INFORMATION/OBSERVATIONS.

RNG was previously evaluated in the report with reference "RNG.GLI.RES-OL.1001.01.01" dated "24 May 2024" by "BMM Spain Testlabs s.l.u."

The aforementioned evaluated game has been tested using the game platform Amarix Audit v1.0.0 as an auxiliary component for the game operation in the game provider environment.

6. COMMENTS.

BMM has conducted a level of testing which has historically been adequate for a submission of this type. However, inherent in testing in a laboratory environment is the unavoidable limitations of it not being possible to verify the effects of all possible configurations and environments that occur in actual gaming venues. Accordingly, subject to the above comment, from the testing performed BMM Spain Testlabs s.l.u confirms that the item under test (unless otherwise stated) conforms with the relevant Technical Requirements.

Yours sincerely,

Rubén Baptista

SVP Operations EURSAM
