

Game Name :- BACCARAT

GAMES RULES:-

Baccarat is a card game played between the Player and the casino (Banker).

This game is played with 8 decks of 52 cards (excluding Jokers), which are shuffled together before each round.

The aim of the game is to predict which hand will be the highest among the Player and the Banker. You can also predict a tie.

The minimum and maximum bets are displayed as MIN/MAX on the table.

Payouts are made according to the Pay-table in the game. To view the Pay-table, click/tap the PAYS link in the left corner of the bottom panel or click/tap the PAYS option in the main menu.

When there is a tie, the Player and Banker bets are pushed
Value of cards 2-9 are face value, Aces count as 1, picture cards and IOs count as 0

Value of the hand is determined by adding the value of the cards dealt and the hand closest to 9 wins

If the value of either hand is 10 or more, 10 is subtracted from the value (eg. 14 becomes 4)

If the value of Player or Banker is 8 or 9, both hands stand

If the value of Player's starting hand is between 0 and 5 (inclusive). Player draws a third card

If the value of Player is 6 or 7, Player stands

If Player stands, Banker draws third card if the value of its starting hand is between 0 and 5 (inclusive)

If Player draws a third card, the Banker will only draw a third card if either.

The value of Banker's starting hand is between 0 and 2 from initial deal
The value of Banker's starting hand is 3 and the Player's third card is not an 8.

The value of the Banker's starting hand is 4 and the Player's third card is between 2 and 7 (inclusive)

The value of the Banker's starting hand is 5 and the Player's third card is between 4 and 7 (inclusive)

Wagers placed on the Banker shall be paid at odds of 1 to 1 except in the event when the Banker wins on Six Points in which case, only 50% of the amount wagered on the Banker shall be paid.

Paytable

Bet	Pays
Player	1 : 1
Banker	1 : 1
Banker wins on 6	0.5 : 1
Tie	8 : 1
