b. Intangible fixed assets

Acquired intangible assets

Intangible assets acquired separately consist mainly of software licences and domain names and are capitalised at cost. Those acquired as part of a business combination are recognised separately from goodwill if the fair value can be measured reliably. These intangible assets are amortised over the useful life of the assets, which for software licences is between one and five years and for domain names is five years.

c. Internally generated intangible assets

Expenditure incurred on development activities of the gaming platform is capitalised only when the expenditure will lead to new or substantially improved products or processes, the products or processes are technically and commercially feasible and the Company has sufficient resources to complete development.

All other development expenditure is expensed. Subsequent expenditure on intangible assets is capitalised only where it clearly increases the economic benefits to be derived from the asset to which it relates. The Company estimates the useful life of these assets as between three and five years,

d. Financial fixed assets

The investments in subsidiaries are stated at cost price.

e. Receivables

Receivables are valued at face value less a provision for possible uncollectable accounts.

f. Cash and cash equivalents

Cash and cash equivalents are stated at face value.

g. Shareholders' equity

Ordinary shares are classified as equity.

h. Current liabilities

On initial recognition current liabilities are recognised at fair value. After initial recognition current liabilities are recognised at the amortised cost price, being the amount received taking into account premiums or discounts and minus transaction costs. This is usually the nominal value.
