

Restricted Territory Enforcement

Verification Report — Broadway Platform ("Demobroadway" operator account)

Prepared for: IT Soft Solutions N.V.

Verification date: 20 August 2026

1. Company Details

Company name	IT Soft Solutions N.V.
Legal form	N.V. (Naamloze Vennootschap)
Managing director / registered agent	Ecorpp Management N.V.
Chamber of Commerce registration no.	166638
CRIB	102702950
Registered address	Hanchi Snoa 19, Willemstad Curaçao

2. Purpose

This report documents a verification of the geo-restriction (country-blocking) configuration on the Broadway Platform operator account "Demobroadway," operated on behalf of IT Soft Solutions N.V. The purpose is to evidence that the platform's country settings correctly designate the intended set of territories as restricted, and that a live access attempt originating from a restricted territory is in fact blocked by the platform.

3. Operator Country Settings

The operator's General Settings > Countries panel shows the platform enabled in 233 countries in total, split between an "Allowed" list and a "Restricted" list. The screenshot below shows the settings panel together with the first segment of the Restricted list (Australia through Czechia).

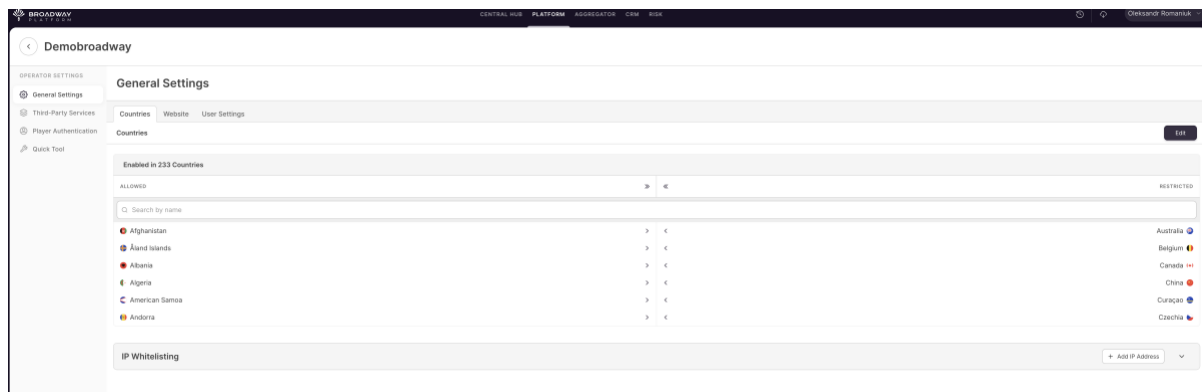

Figure 1 — General Settings > Countries, Demobroadway operator account (Restricted list, Australia–Czechia).

4. Full Restricted Territory List

Scrolling through the Restricted column of the same panel confirms the following 24 territories are configured as restricted on the Demobroadway account. The United Kingdom is highlighted below as it is the territory used for the live block test in Section 5.

Australia	Belgium
Canada	China
Curaçao	Czechia
Denmark	France
Germany	Greece
Hungary	Israel
Italy	Netherlands
Poland	Portugal
Romania	Russia
Singapore	South Africa
Spain	Sweden
United Kingdom of Great Britain and Northern Ireland	United States of America

Supporting screenshots of the Restricted list, in alphabetical order:

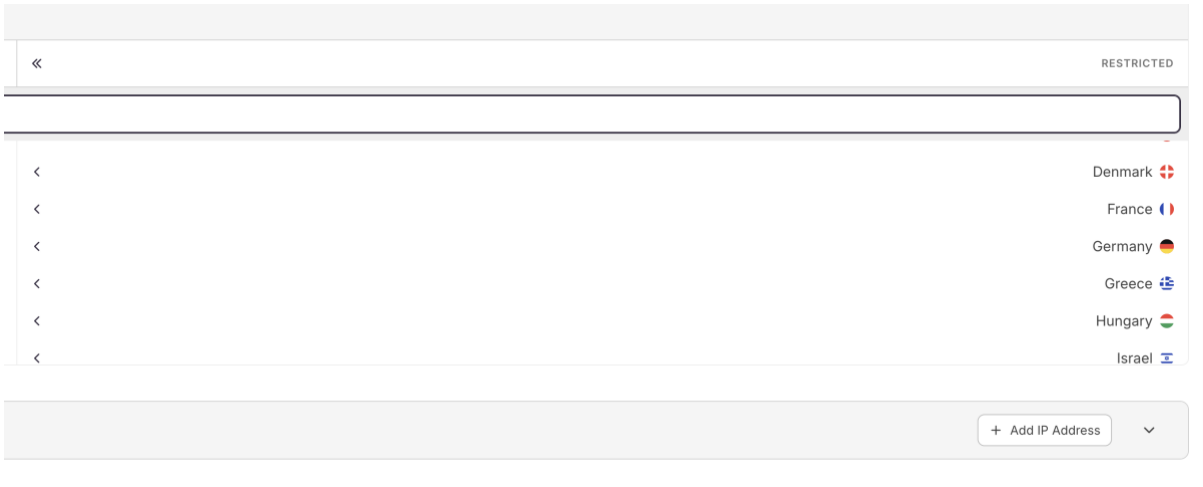

Figure 2 — Restricted list, Denmark–Israel.

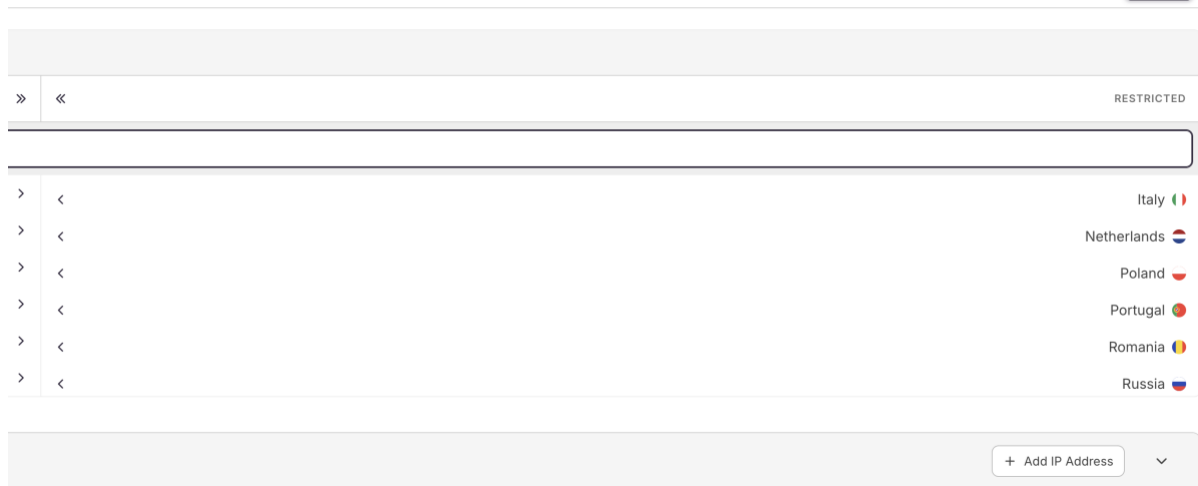

Figure 3 — Restricted list, Italy–Russia.

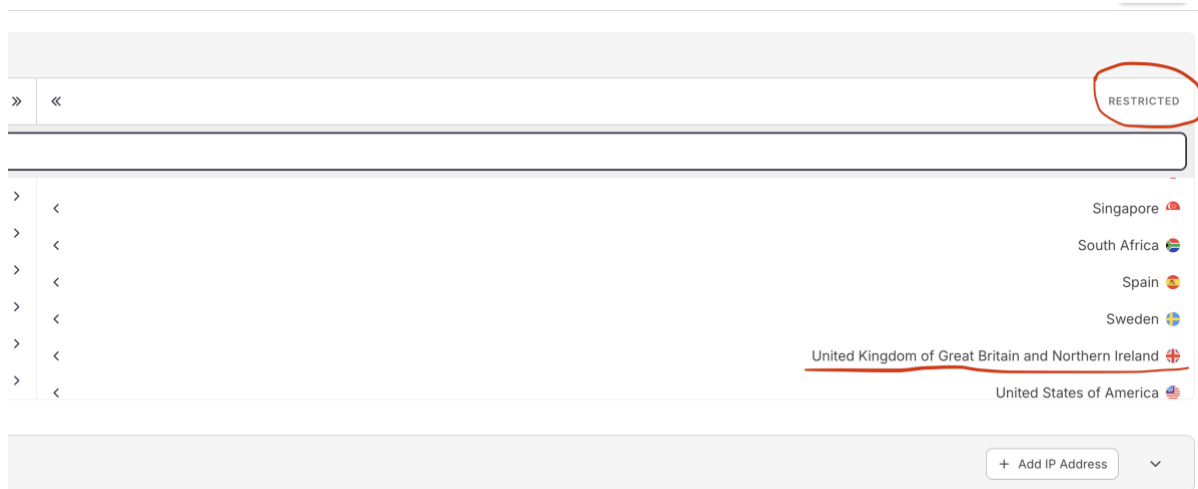

Figure 4 — Restricted list, Singapore–United States, with the United Kingdom entry marked (test territory).

5. Live Verification Test

To confirm the restriction is enforced in practice, the platform was accessed from a live connection identified as originating in the United Kingdom, and the resulting page was captured.

Step 1 — IP address and geolocation check confirming a United Kingdom origin (IP 87.115.79.124, ISP British Telecommunications Limited, Exeter, England):

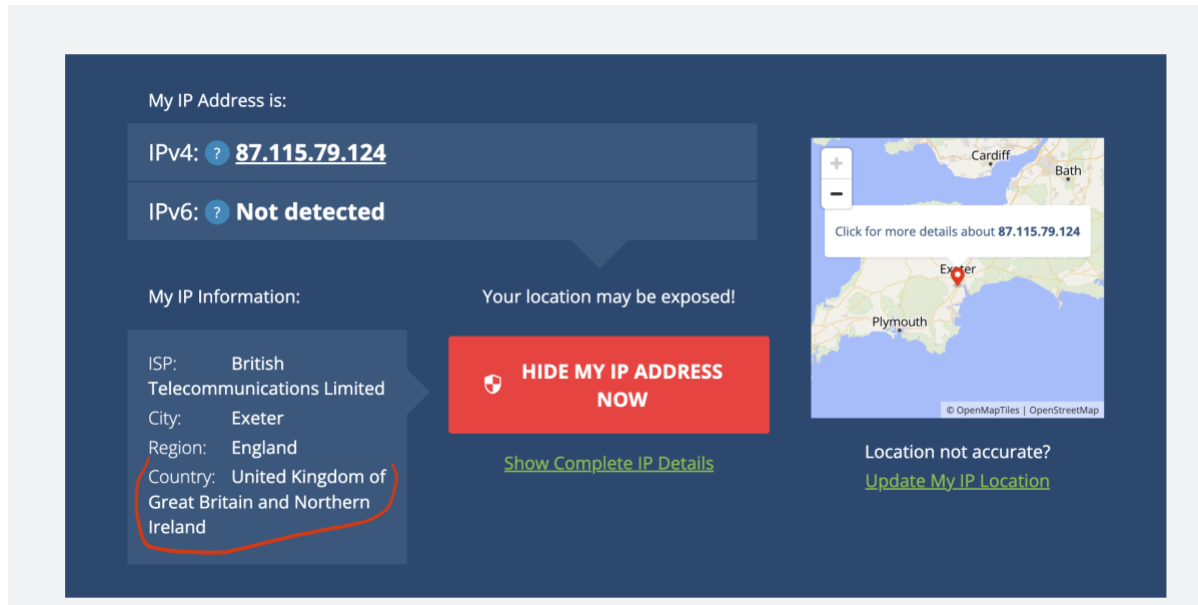

Figure 5 — IP/geolocation lookup confirming the test connection originated in the United Kingdom.

Step 2 — Result when loading the Broadway Platform site from that same UK connection:

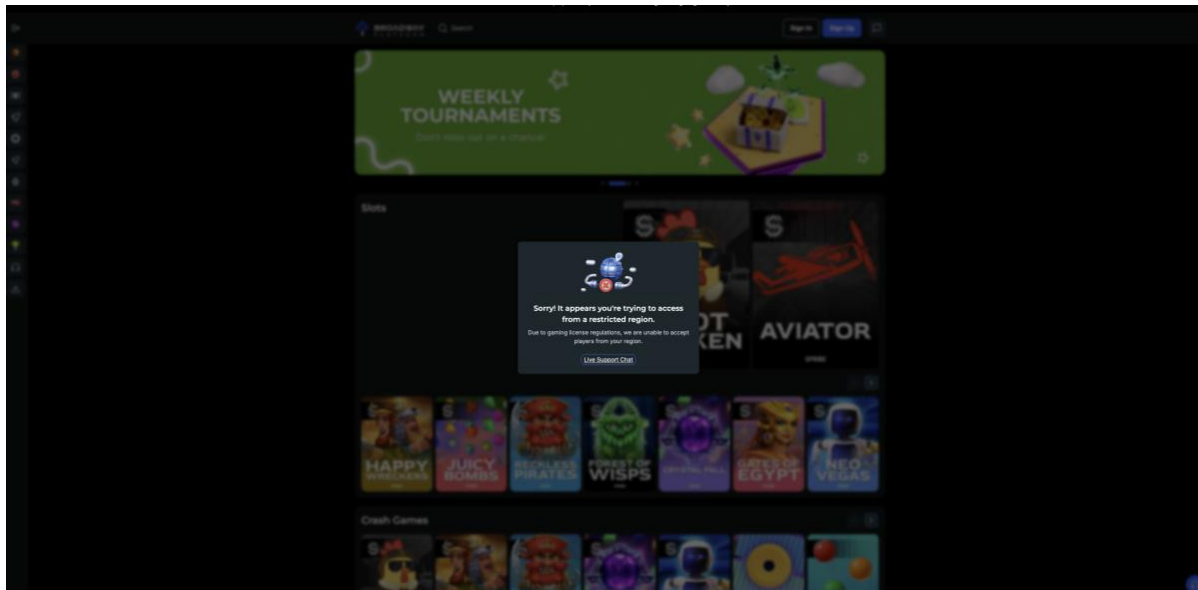

Figure 6 — Broadway Platform blocking access with the message: "Sorry! It appears you're trying to access from a restricted region. Due to gaming license regulations, we are unable to accept players from your region."

6. Findings

The Demobroadway operator account's Countries configuration lists the United Kingdom, and 23 other territories, as Restricted. A live access attempt from a verified United Kingdom IP address (87.115.79.124) was blocked by the platform with an on-screen restricted-region notice, consistent with the configured settings. This confirms that, at the time of testing, the geo-blocking control for this territory was configured correctly and functioning as intended on the Demobroadway account.

This verification covers the single territory and account tested above; it does not itself confirm enforcement for the remaining restricted territories or for other operator accounts, which would require separate testing.
