BOARD OF DIRECTORS AND OTHER OFFICERS

Board of Directors: (SMES) Solutions for Management and Employment Support N.V.

Registered office: Seru Loraweg 17C
Willemstad
Curaçao

Registration number: 140802

MANAGEMENT REPORT

The Board of Directors presents its report and separate financial statements of the Company for the year ended 31 December 2025.

Incorporation

The Company Aspro N.V. was incorporated in Curaçao on 14 July 2016.

Principal activities and nature of operations of the Company

The principal activities of the Company, which are unchanged from last year, is to organize, market, promote, manage, support and operate all types of remote gaming activities, comprising of all types of games, betting and other operation of betting exchange, interactive casinos, bingos, lotteries, poker and other interactive games.

During 2025 the Company was operating under license, No. OGL/2024/565/0553, for use of below URLs:

1. www.asprobet.com
2. www.betingsite.com
3. www.xparibet.com
4. www.linebet.com

Results

The Company's results for the year are set out on page 3.

Dividends

The Board of Directors does not recommend the payment of a dividend and the net profit for the year is retained.

Share capital

There were no changes in the share capital of the Company during the year under review.

Board of Directors

The Board of Directors of the Company as at 31 December 2025 and at the date of this report is presented on page 1.

In accordance with the Company's Articles of Association the Board of Directors presently member of the Board continues in office.

By order of the Board of Directors,

(SMES) Solutions for Management and Employment Support N.V.
Director

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

31 December 2025

1. Incorporation and principal activities**Country of incorporation**

The Company Aspro N.V. (the "Company") was incorporated in Cyprus on 14 July 2016. as a private company with limited liability. Its registered office is at Seru Loraweg 17C, Willemstad, Curaçao.

Principal activities

The principal activities of the Company, which are unchanged from last year, is to organize, market, promote, manage, support and operate all types of remote gaming activities, comprising of all types of games, betting and other operation of betting exchange, interactive casinos, bingos, lotteries, poker and other interactive games.

2. Basis of preparation

The separate financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs) as issued by the IASB. The financial statements have been prepared under the historical cost convention.

3. Adoption of new or revised standards and interpretations

During the current year the Company adopted all the new and revised IFRS Accounting Standards that are relevant to its operations and are effective for accounting periods beginning on 1 January 2025. This adoption did not have a material effect on the accounting policies of the Company.

4. Material accounting policy information

The material accounting policies adopted in the preparation of these separate financial statements are set out below. These policies have been consistently applied to all years presented in these separate financial statements unless otherwise stated.

Subsidiary companies

Subsidiaries are entities controlled by the Company. Control exists where the Company is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Investments in subsidiary companies are stated at cost less provision for impairment in value, which is recognized as an expense in the period in which the impairment is identified.

Revenue**Recognition and measurement**

Revenue represents the amount of consideration to which the Company expects to be entitled in exchange for transferring the promised goods or services to the customer, excluding amounts collected on behalf of third parties (for example, value-added taxes); the transaction price. The Company includes in the transaction price an amount of variable consideration as a result of rebates/discounts only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is subsequently resolved. Estimations for rebates and discounts are based on the Company's experience with similar contracts and forecasted sales to the customer.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

31 December 2025

4. Material accounting policy information (continued)**Revenue (continued)**

The Company recognizes revenue when the parties have approved the contract (in writing, orally or in accordance with other customary business practices) and are committed to perform their respective obligations, the Company can identify each party's rights and the payment terms for the goods or services to be transferred, the contract has commercial substance (i.e. the risk, timing or amount of the Company's future cash flows is expected to change as a result of the contract), it is probable that the Company will collect the consideration to which it will be entitled in exchange for the goods or services that will be transferred to the customer and when specific criteria have been met for each of the Company's contracts with customers.

The Company bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement. In evaluating whether collectability of an amount of consideration is probable, the Company considers only the customer's ability and intention to pay that amount of consideration when it is due.

Estimates of revenues, costs or extent of progress toward completion are revised if circumstances change. Any resulting increases or decreases in estimates are reflected in the statement of profit or loss and other comprehensive income in the period in which the circumstances that give rise to the revision become known by Management.

Identification of performance obligations

The Company assesses whether contracts that involve the provision of a range of goods and/or services contain one or more performance obligations (that is, distinct promises to provide a service) and allocates the transaction price to each performance obligation identified on the basis of its stand-alone selling price. A good or service that is promised to a customer is distinct if the customer can benefit from the good or service, either on its own or together with other resources that are readily available to the customer (that is the good or service is capable of being distinct) and the Company's promise to transfer the good or service to the customer is separately identifiable from other promises in the contract (that is, the good or service is distinct within the context of the contract).

Revenue is measured based on the consideration to which the Company expects to be entitled in a contract with a customer and excludes amounts collected on behalf of third parties. The Company recognizes revenue when it transfers control of a product or service to a customer.

- **Rendering of services**

Rendering of services - over time:

Revenue from rendering of services is recognized over time while the Company satisfies its performance obligation by transferring control over the promised service to the customer in the accounting period in which the services are rendered.

For fixed price contracts, revenue is recognized based on the actual service provided to the end of the reporting period as a proportion of the total services to be provided because the customer receives and uses the benefits simultaneously.

The input method is used to measure progress toward completion of the performance obligation as it provides a faithful depiction of the transfer of the control of the services to the customer.

Rendering of services - at a point in time:

The Company concluded that it transfers control over its services at a point in time, upon receipt by the customer of the service, because this is when the customer benefits from the relevant service.

- **Interest income**

Interest income is recognized on a time-proportion basis using the effective interest method.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

31 December 2025

4. Material accounting policy information (continued)**Foreign currency translation****(1) Functional and presentation currency**

Items included in the Company's financial statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Euro (€), which is the Company's functional and presentation currency.

(2) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in profit or loss.

Dividends

Dividend distribution to the Company's shareholders is recognized in the Company's financial statements in the year in which they are approved by the Company's shareholders.

Financial assets - Classification

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through OCI or through profit or loss), and
- those to be measured at amortized cost.

The classification and subsequent measurement of debt financial assets depends on: (i) the Company's business model for managing the related assets portfolio and (ii) the cash flow characteristics of the asset. On initial recognition, the Company may irrevocably designate a debt financial asset that otherwise meets the requirements to be measured at amortized cost or at FVOCI or at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

For investments in equity instruments that are not held for trading, the classification will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI). This election is made on an investment-by-investment basis.

All other financial assets are classified as measured at FVTPL.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investments in equity instruments that are not held for trading, this will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI).

Financial assets - Recognition and derecognition

All purchases and sales of financial assets that require delivery within the time frame established by regulation or market convention ("regular way" purchases and sales) are recorded at trade date, which is the date when the Company commits to deliver a financial instrument. All other purchases and sales are recognized when the entity becomes a party to the contractual provisions of the instrument.

Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all the risks and rewards of ownership.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

31 December 2025

4. Material accounting policy information (continued)**Financial assets - Measurement**

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVTPL are expensed in profit or loss. Fair value at initial recognition is best evidenced by the transaction price. A gain or loss on initial recognition is only recorded if there is a difference between fair value and transaction price which can be evidenced by other observable current market transactions in the same instrument or by a valuation technique whose inputs include only data from observable markets.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

Financial assets - impairment - credit loss allowance for ECL

The Company assesses on a forward-looking basis the ECL for debt instruments (including loans) measured at amortized cost and FVOCI and exposure arising from loan commitments and financial guarantee contracts. The Company measures ECL and recognizes credit loss allowance at each reporting date. The measurement of ECL reflects: (i) an unbiased and probability weighted amount that is determined by evaluating a range of possible outcomes, (ii) time value of money and (iii) all reasonable and supportable information that is available without undue cost and effort at the end of each reporting period about past events, current conditions and forecasts of future conditions.

The carrying amount of the financial assets is reduced through the use of an allowance account, and the amount of the loss is recognized in the statement of profit or loss and other comprehensive income within "net impairment losses on financial and contract assets. Subsequent recoveries of amounts for which loss allowance was previously recognized are credited against the same line item.

Debt instruments carried at amortized cost are presented in the statement of financial position net of the allowance for ECL. For loan commitments and financial guarantee contracts, a separate provision for ECL is recognized as a liability in the statement of financial position.

For debt instruments at FVOCI, an allowance for ECL is recognized in profit or loss and it affects fair value gains or losses recognized in OCI rather than the carrying amount of those instruments.

The impairment methodology applied by the Company for calculating expected credit losses depends on the type of financial asset assessed for impairment. Specifically:

For trade receivables and contract assets, including trade receivables and contract assets with a significant financing component, and lease receivables the Company applies the simplified approach permitted by IFRS 9, which requires lifetime expected credit losses to be recognized from initial recognition of the financial assets.

For all other financial instruments that are subject to impairment under IFRS 9, the Company applies general approach - three stage model for impairment. The Company applies a three stage model for impairment, based on changes in credit quality since initial recognition. A financial instrument that is not credit-impaired on initial recognition is classified in Stage 1.

Financial assets in Stage 1 have their ECL measured at an amount equal to the portion of lifetime ECL that results from default events possible within the next 12 months or until contractual maturity, if shorter ("12 Months ECL"). If the Company identifies a significant increase in credit risk ("SICR") since initial recognition, the asset is transferred to Stage 2 and its ECL is measured based on ECL on a lifetime basis, that is, up until contractual maturity but considering expected prepayments, if any ("Lifetime ECL"). Refer to note 6, Credit risk section, for a description of how the Company determines when a SICR has occurred. If the Company determines that a financial asset is credit-impaired, the asset is transferred to Stage 3 and its ECL is measured as a Lifetime ECL. The Company's definition of credit impaired assets and definition of default is explained in note 6, Credit risk section.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

31 December 2025

4. Material accounting policy information (continued)**Financial assets - Reclassification**

Financial instruments are reclassified only when the business model for managing those assets changes. The reclassification has a prospective effect and takes place from the start of the first reporting period following the change.

Financial assets - write-off

Financial assets are written-off, in whole or in part, when the Company exhausted all practical recovery efforts and has concluded that there is no reasonable expectation of recovery. The write-off represents a derecognition event. The Company may write-off financial assets that are still subject to enforcement activity when the Company seeks to recover amounts that are contractually due, however, there is no reasonable expectation of recovery.

Financial assets - modification

The Company sometimes renegotiates or otherwise modifies the contractual terms of the financial assets. The Company assesses whether the modification of contractual cash flows is substantial considering, among other, the following factors: any new contractual terms that substantially affect the risk profile of the asset (e.g. profit share or equity-based return), significant change in interest rate, change in the currency denomination, new collateral or credit enhancement that significantly affects the credit risk associated with the asset or a significant extension of a loan when the borrower is not in financial difficulties.

If the modified terms are substantially different, the rights to cash flows from the original asset expire and the Company derecognizes the original financial asset and recognizes a new asset at its fair value. The date of renegotiation is considered to be the date of initial recognition for subsequent impairment calculation purposes, including determining whether a SICR has occurred. The Company also assesses whether the new loan or debt instrument meets the SPPI criterion. Any difference between the carrying amount of the original asset derecognized and fair value of the new substantially modified asset is recognized in profit or loss, unless the substance of the difference is attributed to a capital transaction with owners.

In a situation where the renegotiation was driven by financial difficulties of the counterparty and inability to make the originally agreed payments, the Company compares the original and revised expected cash flows to assets whether the risks and rewards of the asset are substantially different as a result of the contractual modification. If the risks and rewards do not change, the modified asset is not substantially different from the original asset and the modification does not result in derecognition. The Company recalculates the gross carrying amount by discounting the modified contractual cash flows by the original effective interest rate, and recognizes a modification gain or loss in profit or loss.

Classification as financial assets at amortized cost

These amounts generally arise from transactions outside the usual operating activities of the Company. They are held with the objective to collect their contractual cash flows and their cash flows represent solely payments of principal and interest. Accordingly, these are measured at amortized cost using the effective interest method, less provision for impairment. Financial assets at amortized cost are classified as current assets if they are due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current assets.

Classification as trade and other receivables

Trade and other receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. If collection is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are presented as non-current assets. Trade and other receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less loss allowance.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

31 December 2025

4. Material accounting policy information (continued)**Classification as trade and other receivables (continued)**

Trade and other receivables are recognized initially at the amount of consideration that is unconditional unless they contain significant financing components, in which case they are recognized at fair value. The Company holds the trade and other receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortized cost using the effective interest method.

Trade and other receivables are also subject to the impairment requirements of IFRS 9. The Company applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables. See note 6, Credit risk section.

Trade and other receivables are written off when there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include, amongst others, the failure of a debtor to engage in a repayment plan with the Company, and a failure to make contractual payments for a period of greater than 180 days past due.

Financial liabilities - measurement categories

Financial liabilities are initially recognized at fair value and classified as subsequently measured at amortized cost, except for (i) financial liabilities at FVTPL: this classification is applied to derivatives, financial liabilities held for trading (e.g. short positions in securities), contingent consideration recognized by an acquirer in a business combination and other financial liabilities designated as such at initial recognition and (ii) financial guarantee contracts and loan commitments.

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

Trade payables

Trade payables are initially measured at fair value and are subsequently measured at amortized cost, using the effective interest rate method.

Financial liabilities - Modifications

An exchange between the Company and its original lenders of debt instruments with substantially different terms, as well as substantial modifications of the terms and conditions of existing financial liabilities, are accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10% different from the discounted present value of the remaining cash flows of the original financial liability. (In addition, other qualitative factors, such as the currency that the instrument is denominated in, changes in the type of interest rate, new conversion features attached to the instrument and change in loan covenants are also considered.)

If an exchange of debt instruments or modification of terms is accounted for as an extinguishment, any costs or fees incurred are recognized as part of the gain or loss on the extinguishment. If the exchange or modification is not accounted for as an extinguishment, any costs or fees incurred adjust the carrying amount of the liability and are amortized over the remaining term of the modified liability.

Modifications of liabilities that do not result in extinguishment are accounted for as a change in estimate using a cumulative catch up method, with any gain or loss recognized in profit or loss, unless the economic substance of the difference in carrying values is attributed to a capital transaction with owners and is recognized directly to equity.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

31 December 2025

4. Material accounting policy information (continued)**Financial liabilities - Modifications (continued)**

Borrowing costs are interest and other costs that the Company incurs in connection with the borrowing of funds, including interest on borrowings, amortization of discounts or premium relating to borrowings, amortization of ancillary costs incurred in connection with the arrangement of borrowings, finance lease charges and exchange differences arising from foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs.

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset, being an asset that necessarily takes a substantial period of time to get ready for its intended use or sale, are capitalized as part of the cost of that asset, when it is probable that they will result in future economic benefits to the Company and the costs can be measured reliably.

Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the statement of financial position.

Prepayments

Prepayments are carried at cost less provision for impairment. A prepayment is classified as non-current when the goods or services relating to the prepayment are expected to be obtained after one year, or when the prepayment relates to an asset which will itself be classified as non-current upon initial recognition. Prepayments to acquire assets are transferred to the carrying amount of the asset once the Company has obtained control of the asset and it is probable that future economic benefits associated with the asset will flow to the Company. Other prepayments are written off to profit or loss when the goods or services relating to the prepayments are received. If there is an indication that the assets, goods or services relating to a prepayment will not be received, the carrying value of the prepayment is written down accordingly and a corresponding impairment loss is recognized in profit or loss.

Share capital

Ordinary shares are classified as equity.

5. New accounting pronouncements

At the date of approval of these separate financial statements, standards and interpretations were issued by the International Accounting Standards Board which were not yet effective. Some of them were adopted by the European Union and others not yet. The Board of Directors expects that the adoption of these accounting standards in future periods will not have a material effect on the separate financial statements of the Company.

6. Financial risk management**Financial risk factors**

The Company is exposed to credit risk, liquidity risk, currency risk and capital risk management arising from the financial instruments it holds. The risk management policies employed by the Company to manage these risks are discussed below:

6.1 Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to meet an obligation. Credit risk arises from trade and other receivables.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

31 December 2025

6. Financial risk management (continued)**6.1 Credit risk (continued)****(i) Risk management**

Credit risk is managed on a group basis.

There are no significant concentrations of credit risk, whether through exposure to individual customers, specific industry sectors and/or regions.

These policies enable the Company to reduce its credit risk significantly.

(ii) Impairment of financial assets

The Company has the following types of financial assets that are subject to the expected credit loss model:

- trade and other receivables

The impairment methodology applied by the Company for calculating expected credit losses depends on the type of financial asset assessed for impairment. Specifically:

- For trade receivables the Company applies the simplified approach permitted by IFRS 9, which requires lifetime expected losses to be recognized from initial recognition of the financial assets.
- For all other financial assets that are subject to impairment under IFRS 9, the Company applies general approach - three stage model for impairment. The Company applies a three-stage model for impairment, based on changes in credit quality since initial recognition. A financial asset that is not credit-impaired on initial recognition is classified in Stage 1. Financial assets in Stage 1 have their ECL measured at an amount equal to the portion of lifetime ECL that results from default events possible within the next 12 months or until contractual maturity, if shorter ("12 Months ECL"). If the Company identifies a significant increase in credit risk ("SICR") since initial recognition, the asset is transferred to Stage 2 and its ECL is measured based on ECL on a lifetime basis, that is, up until contractual maturity but considering expected prepayments, if any ("Lifetime ECL"). If the Company determines that a financial asset is credit-impaired, the asset is transferred to Stage 3 and its ECL is measured as a Lifetime ECL.

Impairment losses are presented as net impairment losses on financial and contract assets within operating profit. Subsequent recoveries of amounts previously written off are credited against the same line item.

Significant increase in credit risk

The Company considers the probability of default upon initial recognition of the asset and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period. To assess whether there is a significant increase in credit risk the Company compares the risk of a default occurring on the financial asset as at the reporting date with the risk of default as at the date of initial recognition. It considers available reasonable and supportive forwarding-looking information. Especially the following indicators are incorporated:

- internal credit rating
- external credit rating (as far as available)
- actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to the borrower's/counterparty's ability to meet its obligations
- actual or expected significant changes in the operating results of the borrower/counterparty
- significant increases in credit risk on other financial instruments of the same borrower/counterparty
- significant changes in the value of the collateral supporting the obligation or in the quality of third-party guarantees or credit enhancements
- significant changes in the expected performance and behavior of the borrower/counterparty, including changes in the payment status of counterparty in the Company and changes in the operating results of the borrower/counterparty.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

31 December 2025

6. Financial risk management (continued)**6.1 Credit risk (continued)****(ii) Impairment of financial assets (continued)**

Macroeconomic information (such as market interest rates or growth rates) is incorporated as part of the internal rating model. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. The Company has identified the GDP and the unemployment rate of the countries in which it sells its goods and services to be the most relevant factors, and accordingly adjusts the historical loss rates based on expected changes in these factors. No significant changes to estimation techniques or assumptions were made during the reporting period.

Regardless of the analysis above, a significant increase in credit risk is presumed if a debtor is more than 30 days past due in making a contractual payment.

Low credit risk

The Company has decided to use the low credit risk assessment exemption for investment grade financial assets. Management consider 'low credit risk' for listed bonds to be an investment grade credit rating with at least one major rating agency. Other instruments are considered to be low credit risk when they have a low risk of default and the issuer has a strong capacity to meet its contractual cash flow obligations in the near term.

Default

A default on a financial asset is when the counterparty fails to make contractual payments within 90 days of when they fall due.

Write-off

Financial assets are written off when there is no reasonable expectation of recovery, such as a debtor failing to engage in a repayment plan with the Company. The Company categorizes a debt financial asset for write off when a debtor fails to make contractual payments greater than 180 days past due. Where debt financial assets have been written off, the Company continues to engage in enforcement activity to attempt to recover the receivable due. Where recoveries are made, these are recognized in profit or loss.

The Company's exposure to credit risk for each class of (asset/instrument) subject to the expected credit loss model is set out below:

Trade and other receivables

The Company applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables (including those with a significant financing component, and contract assets.

To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due. The contract assets relate to unbilled work in progress and have substantially the same risk characteristics as the trade receivables for the same types of contracts. The Company has therefore concluded that the expected loss rates for trade receivables are a reasonable approximation of the loss rates for the contract assets.

The expected loss rates are based on the payment profiles of sales over a period of 36 months before 31 December 2025 or 1 January 2025 respectively and the corresponding historical credit losses experienced within this period. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. The Company has identified the GDP and the unemployment rate of the countries in which it sells its goods and services to be the most relevant factors, and accordingly adjusts the historical loss rates based on expected changes in these factors.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

31 December 2025

6. Financial risk management (continued)**6.1 Credit risk (continued)**

(ii) Impairment of financial assets (continued)

Trade and other receivables (continued)

There were no significant trade receivable and contract asset balances written off during the year that are subject to enforcement activity.

Receivables from related parties

For receivables from related parties lifetime ECL was provided for them upon initial application of IFRS 9 until these financial assets are derecognized as it was determined on initial application of IFRS 9 that it would require undue cost and effort to determine whether their credit risk has increased significantly since initial recognition to the date of initial application of IFRS 9.

The Company does not hold any collateral as security for any receivables from related parties.

There were no significant receivables from related parties written off during the year that are subject to enforcement activity.

6.2 Liquidity risk

Liquidity risk is the risk that arises when the maturity of assets and liabilities does not match. An unmatched position potentially enhances profitability, but can also increase the risk of losses. The Company has procedures with the object of minimizing such losses such as maintaining sufficient cash and other highly liquid current assets and by having available an adequate amount of committed credit facilities.

The following tables detail the Company's remaining contractual maturity for its financial liabilities. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The table includes both interest and principal cash flows.

31 December 2025	Carrying amounts	Contractual cash flows	3 months or less	3-12 months	1-2 years	2-5 years	More than 5 years
	€	€	€	€	€	€	€
Trade and other payables	5,846,844	5,846,844	-	5,846,844	-	-	-
Payables to related parties	242,321	242,321	-	242,321	-	-	-
	6,089,165	6,089,165	-	6,089,165	-	-	-
31 December 2024	Carrying amounts	Contractual cash flows	3 months or less	3-12 months	1-2 years	2-5 years	More than 5 years
	€	€	€	€	€	€	€
Trade and other payables	5,834,228	5,834,228	-	5,834,228	-	-	-
Payables to related parties	1,000	1,000	-	1,000	-	-	-
	5,835,228	5,835,228	-	5,835,228	-	-	-

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

31 December 2025

6. Financial risk management (continued)**6.3 Currency risk**

Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. Currency risk arises when future commercial transactions and recognized assets and liabilities are denominated in a currency that is not the Company's measurement currency. The Company's Management monitors the exchange rate fluctuations on a continuous basis and acts accordingly.

6.4 Capital risk management

Capital includes equity shares and share premium, convertible preference shares and loan from parent company.

The Company manages its capital to ensure that it will be able to continue as a going concern while maximizing the return to shareholders through the optimization of the debt and equity balance. The Company's overall strategy remains unchanged from last year.

7. Critical accounting estimates, judgments and assumptions

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Critical accounting estimates and assumptions

The Company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

- **Calculation of loss allowance**

When measuring expected credit losses the Company uses reasonable and supportable forward looking information, which is based on assumptions for the future movement of different economic drivers and how these drivers will affect each other.

Loss given default is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, taking into account cash flows from collateral and integral credit enhancements.

Probability of default constitutes a key input in measuring ECL. Probability of default is an estimate of the likelihood of default over a given time horizon, the calculation of which includes historical data, assumptions and expectations of future conditions.

Critical judgements in applying the Company's accounting policies

- **Impairment of investments in subsidiaries**

The Company periodically evaluates the recoverability of investments in subsidiaries whenever indicators of impairment are present. Indicators of impairment include such items as declines in revenues, earnings or cash flows or material adverse changes in the economic or political stability of a particular country, which may indicate that the carrying amount of an asset is not recoverable. If facts and circumstances indicate that investment in subsidiaries may be impaired, the estimated future discounted cash flows associated with these subsidiaries would be compared to their carrying amounts to determine if a write-down to fair value is necessary.
