These territories are excluded primarily due to local legal restrictions, international sanctions, or high compliance risk.

Exclusion Process

1. **Account Creation Stage**
 - IP and geolocation checks are performed. Users attempting to access from excluded territories are blocked at registration.
2. **Ongoing Monitoring**
 - Device fingerprinting and payment method checks are conducted to identify users who may circumvent geo-blocking.
 - Accounts detected as originating from excluded territories are immediately suspended.

Timing of Exclusion

- Exclusion measures are applied **immediately at onboarding** (registration/first access).
- Continuous monitoring ensures that any subsequent attempt from excluded regions is blocked in real-time.
- The exclusion list is **reviewed and updated annually**, or earlier if new sanctions/legislation are introduced.
