

OPERATIONS MANUAL

Disrupt Entertainment B.V.

a Company with registered address at KAYA RICHARD J. BEAUJON Z/N, CURACAO,
registration number 140327, CGA License number OGL/2024/668/0844 (herein after referred to
as “**Company, License Holder**”)

Policy owner	Compliance Officer and/or MLRO
Approved by	Board of Directors
Effective date	19 August 2026
Review frequency	Annually
Version	1.0

1 Introduction

1.1 Purpose of the Operations Manual

This Operations Manual (“Manual”) has been prepared and maintained by the License Holder in accordance with Article 5.9 of the National Ordinance on Games of Chance (“LOK”), applicable Curaçao Gaming Authority (“CGA”) requirements, and all rules, restrictions, and conditions attached to the Gaming License issued to the License Holder.

The purpose of this Manual is to provide a comprehensive description of the operational, technical, compliance, governance, and player protection measures implemented by the License Holder in connection with the operation of its Games of Chance activities.

This Manual describes the manner and degree of compliance maintained by the License Holder with applicable legal, regulatory, technical, and operational requirements governing the provision of online Games of Chance and associated services.

The Manual further serves as:

- a regulatory compliance document;
- an operational governance document;
- a technical and infrastructure reference document;
- an internal control framework;
- and an inspection-ready document available to the Curaçao Gaming Authority upon request.

The License Holder shall maintain this Manual on an ongoing basis and ensure that it is updated whenever material operational, technical, regulatory, or organizational changes occur.

1.2 Scope

This Manual applies to:

- all gaming operations conducted by the License Holder;
- all websites, domains operated under the Gaming License;
- all employees, officers, directors, contractors, consultants, and outsourced service providers involved in the gaming operation;
- all technical systems, gaming systems, payment systems, and supporting infrastructure used by the License Holder;
- all players and customer interactions relating to the gaming operation;
- and all operational activities carried out in connection with the offering of Games of Chance.

1.3 Regulatory Framework

The License Holder conducts its operations in accordance with all applicable laws, regulations, regulatory guidance, and licensing conditions, including but not limited to:

- the National Ordinance on Games of Chance (LOK);
- the National Ordinance on Identification when Rendering Services (NOIS);
- the National Ordinance on the Reporting of Unusual Transactions (NORUT);
- the Sanctions National Ordinance of Curaçao;
- the Kingdom Sanction Law (Rijkswet Financiële Sancties);
- applicable directives, policies, standards, and guidance issued by the Curaçao Gaming Authority;
- applicable anti-money laundering and counter-terrorist financing legislation;
- applicable data protection and privacy laws;
- and applicable international sanctions regimes, including United Nations and European Union restrictive measures where relevant.

The License Holder additionally implements operational standards and internal controls aligned with internationally recognized best practices, including risk-based compliance measures and player protection standards applicable to online gaming operations.

1.4 Definitions

Term	Definition
Account	A registered player account maintained within the gaming platform allowing access to Games of Chance and related services.
AML/CFT	Anti-Money Laundering and Counter-Terrorist Financing measures, including policies, procedures, monitoring systems, and reporting obligations implemented to prevent financial crime.
Audit Trail	A chronological electronic record documenting operational activities, transactions, access events, or system modifications.
Bonus	Any promotional incentive, reward, free spin, cashback, wagering enhancement, or similar promotional benefit offered to players.
Business Continuity Plan (“BCP”)	Internal procedures and contingency measures are designed to ensure continued operation during disruptions or emergency situations.
CGA	Curaçao Gaming Authority, being the competent supervisory authority responsible for regulating Games of Chance activities in Curaçao.
Compliance Officer	The designated person responsible for overseeing compliance with applicable legal, regulatory, and internal compliance obligations.
Cooling-Off Period	A temporary voluntary restriction period during which a player limits or suspends access to gaming activities.
Customer Due Diligence (“CDD”)	Identification and verification procedures applied to players in accordance with AML/CFT obligations.

Term	Definition
Disaster Recovery Plan (“DRP”)	Procedures intended to restore operational systems, infrastructure, and data following a technical disruption or emergency situation.
Enhanced Due Diligence (“EDD”)	Additional verification and monitoring procedures applied to higher-risk players or transactions.
Financial Transaction	Any deposit, withdrawal, transfer, payment, wagering-related transaction, or movement of funds conducted through the gaming operation.
Fraud Prevention Measures	Operational, technical, and compliance controls intended to identify, prevent, and investigate fraudulent activity.
Game Provider	A third-party supplier providing gaming content, gaming software, or gaming functionality to the operation.
Games of Chance	Any game, betting activity, gambling product, or gaming service offered under the Gaming License where outcomes are determined wholly or partially by chance.
Gaming License	The license issued by the Curaçao Gaming Authority authorizing the License Holder to conduct Games of Chance activities.
Gaming Platform	The technical and operational environment through which the License Holder offers Games of Chance to players.
Geolocation Controls	Technical measures are used to identify and restrict access from prohibited jurisdictions or locations.
KYC	“Know Your Customer” procedures applied to identify and verify player identity and assess player risk.
License Holder	The legal entity (name) operates the gaming platform under the applicable Gaming License.
Live Casino	Games of Chance streamed in real time and conducted by live dealers.
LOK	The National Ordinance on Games of Chance of Curaçao.
MLRO	Money Laundering Reporting Officer responsible for AML/CFT reporting obligations and related compliance oversight.
NOIS	National Ordinance on Identification when Rendering Services.
NORUT	National Ordinance on the Reporting of Unusual Transactions.
Operational Records	Electronic or physical records relating to player activity, transactions, operational systems, compliance, or technical infrastructure.
Payment Service Provider (“PSP”)	A third-party provider facilitating deposits, withdrawals, or payment processing services.
Player	Any individual who registers for or participates in Games of Chance is offered through the operation.
Problem Gambling	Gambling behavior may cause financial, emotional, social, or psychological harm to the player or others.
Random Number Generator (“RNG”)	A certified software or hardware mechanism generating random and unpredictable gaming outcomes.

Term	Definition
Responsible Gaming	Measures, controls, and procedures intended to minimize gambling-related harm and support safe gambling practices.
Restricted Jurisdiction	Any jurisdiction from which participation in the gaming operation is prohibited by law, regulation, sanctions, licensing conditions, or internal policy.
RTP	“Return to Player” percentage representing the theoretical payout percentage of a gaming product over time.
Self-Exclusion	A voluntary restriction requested by a player preventing participation in Games of Chance for a specified period.
Sanctions Screening	Screening procedures are used to identify persons, entities, wallet addresses, or jurisdictions subject to sanctions or restrictions.
Technical Infrastructure	The servers, databases, applications, network systems, cloud environments, and supporting technical components used to operate the gaming platform.
Tier-IV Data Center	A data center meeting Tier-IV certification standards relating to redundancy, uptime, fault tolerance, and infrastructure resilience.
Transaction Monitoring	Monitoring activities designed to identify suspicious, fraudulent, or unusual transactional behavior.
Vulnerable Person	A person considered vulnerable under applicable laws, regulations, responsible gaming policies, or operational risk indicators, including minors and persons demonstrating problematic gambling behavior.
Wallet System	The internal system used to maintain player balances, transaction records, and financial account functionality.

1.5. Operational Principles

The License Holder is committed to conducting its operations in a lawful, fair, transparent, secure, and socially responsible manner.

The operational framework of the License Holder is based upon the following core principles:

- integrity of gaming operations;
- fairness and transparency of Games of Chance;
- protection of players and vulnerable persons;
- prevention of money laundering, terrorist financing, fraud, and criminal misuse of the operation;
- safeguarding of player funds and personal data;
- maintenance of secure and resilient technical infrastructure;
- responsible gaming and harm prevention;
- effective governance and oversight;
- and full cooperation with competent regulatory and supervisory authorities.

1.6 Maintenance and Review of the Manual

This Manual shall be reviewed periodically and updated whenever:

- material changes occur to the gaming operation;
- new gaming products or payment methods are introduced;
- changes are made to technical infrastructure or software systems;
- applicable laws or regulatory requirements are amended;
- operational risks materially change;
- or deficiencies are identified through audits, inspections, or compliance reviews.

The License Holder shall ensure that the most recent version of this Manual is maintained and made available to the Curaçao Gaming Authority within the timeframes required under applicable law and regulatory requirements.

2 Games of Chance Offered

2.1 Gaming Products

The Operator offers:

- Casino Games
- Live Casino Games
- Crash Games

A detailed Games Register is maintained separately and contains all approved game titles and providers.

2.2 Rules of Play

Rules applicable to each game are displayed within the game interface and become available when the player launches the game. General operating rules are also set out in the Terms and Conditions.

2.3 Game Providers

Gaming content is supplied through third-party providers, including:

- Evolution
- Spinomenal
- Habanero
- Pragmatic Play
- Microgaming
- Hacksaw
- Endorphina
- Redrake
- Skywind
- Wazdan
- SlotMatrix-Fantasma
- Playson

Additional providers are listed in the Games Register.

2.4 Jurisdictional Restrictions

Game providers maintain territory-specific restrictions. The Operator implements IP-based restrictions and game filtering mechanisms to prevent access from prohibited jurisdictions. Only approved content is made available to eligible players.

3 Payment Possibilities

3.1 Deposit Methods

Accepted deposit methods include:

- Credit Cards
- Debit Cards
- Open Banking
- Cryptocurrency

3.2 Withdrawal Methods

Withdrawals are processed through:

- Verified credit/debit cards
- Verified bank accounts via Open Banking

3.3 Payment Service Providers

The Operator utilizes:

- Nuvei
- Yugo
- Interac
- CoinsPaid

3.4 Verification Requirements

All payment methods are subject to verification requirements aligned with CGA regulations. Withdrawals may only be made to payment accounts held in the player's own name.

3.5 Suspicious Transactions

Suspicious, reversed, failed, or unusual transactions are reviewed through KYC, AML, and fraud monitoring procedures before processing decisions are made.

4 Bet Amounts

Bet limits vary by game provider and game type.

The Operator applies:

- Provider-specific exposure limits
- Responsible gaming limits

- Anti-fraud controls
- Deposit limits
- Stake limits
- Loss limits
- Session limits

Players may reduce limits immediately. Increases are subject to a mandatory 24-hour cooling period and are recorded within the platform audit trail.

5 Payouts and Winnings

5.1 RTP and Odds

Return-to-Player percentages, odds, prize structures, and promotional terms are displayed on the website and within applicable games and promotions.

5.2 Crediting Winnings

Winnings may be credited to:

- Real Money Balance
- Bonus Balance

Bonus funds may be subject to wagering requirements before conversion to withdrawable funds.

5.3 Error Handling

Where a game, system, or payment error affects a payout:

1. The relevant provider is contacted.
2. An investigation report is requested.
3. The Operator determines a resolution based on provider findings and applicable game rules.

6 Software Used in the Operation

6.1 Core Platform

The primary Player Account Management (PAM) platform is Dench eGaming Solutions.

6.2 Supporting Systems

Function	System
Game Aggregation	EveryMatrix
Wallet	Dench
CRM	Dench
Reporting	Dench
Responsible Gaming	Dench
Fraud Monitoring	Dench
Back Office	Dench
KYC / AML	iDenfy
Payments	Nuvei, Interac, Yugo, CoinsPaid

6.3 Access Control

All systems operate under Role-Based Access Control (RBAC) with permission levels assigned based on operational responsibilities.

7 Outcome Determining Elements

Game outcomes are determined as follows:

Product Type	Outcome Mechanism
Casino Games	Certified RNG
Crash Games	Certified RNG / Algorithm
Live Casino	Live Dealer Outcomes

RNG certification is independently tested and maintained by the relevant game providers. Certificates can be supplied upon request.

8 Periodic Test Methods for Quality Monitoring

The Operator performs testing before each production release.

Testing includes:

- Functional testing
- QA testing
- Payment testing
- Vulnerability assessments
- Disaster recovery testing
- Responsible gaming control testing
- AML control testing

Internal systems are tested by the Dench QA team, while provider systems are independently certified by approved laboratories. Results are documented and corrective actions must be completed before release.

8.1 Testing Governance and Corrective Actions

All systems used in the gaming operation, including the Dench Platform and third-party systems, are tested before deployment to the production environment. Testing is performed during each release cycle and includes functional testing, integration testing, payment testing, security testing, disaster recovery testing, responsible gaming control testing, AML control testing, and platform stability testing

Testing of internally developed systems is conducted by the Operator's development and quality assurance teams. Testing of game platforms, RNGs, and other third-party services is conducted by independent testing laboratories engaged by the respective suppliers.

Test results are documented within QA reports, release records, ticketing systems, and laboratory certifications. Where deficiencies are identified, corrective actions must be completed and verified through follow-up testing before release approval is granted. The QA Lead is responsible for final sign-off of internal releases. Third-party providers are responsible for obtaining validation of corrective actions from their testing laboratories where applicable.

9 Storage of Players' Personal Data

9.1 Data Collected

The Operator stores:

- Full name

- Address
- Date of birth
- Gender
- Email address
- Telephone number
- Identity documents
- Gameplay records
- Transaction history
- Device fingerprints
- IP addresses

9.2 Data Protection Measures

Security controls include:

- RBAC
- Two-Factor Authentication
- TLS Encryption
- Database Encryption at Rest
- Audit Logging

Only authorized personnel may access player information.

9.3 Retention Period

Player records are retained for five years.

9.4 Access Control and Audit Logging

Access to player data is restricted to authorized personnel based on role and operational necessity. Access permissions are managed through Role-Based Access Control (RBAC), and all access activities are recorded within the platform audit trail.

Only approved personnel are granted access to player information, and permission levels correspond to job functions and operational responsibilities. Administrative access is reviewed periodically by management and compliance personnel.

9.5 Data Subject Requests

Players may request access, correction, or deletion of their personal data through Customer Support. Requests are reviewed by the Compliance and Data Protection function and are processed within a target timeframe of thirty (30) days, subject to applicable legal and regulatory retention requirements. All requests and actions taken are recorded in the platform audit trail.

9.6 Backup and Recovery Controls

Player information is protected through encryption in transit using TLS, encryption at rest within the database environment, RBAC controls, two-factor authentication, and comprehensive audit logging. Regular backups are maintained to protect against accidental loss, corruption, or unauthorized alteration of information. Recovery arrangements are governed by the Operator's Business Continuity and Disaster Recovery Plan.

10 Visual Elements Shown to Players

The Operator currently operates:

- slots99.io
- grandelix.com

Both websites display:

- Operator branding
- License information
- Responsible gaming information
- Terms and Conditions links
- Deposit interfaces
- Promotional content
- Complaint channels
- Gambling harm warnings
- CGA digital seal

Visual presentation is consistent across desktop and mobile experiences.

11 Prevention of Participation by Prohibited Persons

The Operator prevents participation by:

- Minors
- Self-excluded individuals
- Excluded persons
- Persons with insufficient gambling control
- Bankrupt individuals
- Sanctioned persons

Verification measures include:

- Age verification
- iDenfy screening
- AML screening
- Device fingerprinting
- IP analysis
- Geolocation checks
- Duplicate account detection

Checks occur during registration, login, deposits, and withdrawals.

11.1 Screening and Monitoring Workflow

The Operator performs screening and monitoring activities at registration, login, deposit, withdrawal, and during account reviews. Screening controls include age verification, sanction screening, AML monitoring, duplicate-account detection, device fingerprinting, IP analysis, geolocation controls, and self-exclusion checks.

The Operator utilizes iDenfy services together with internal monitoring tools to identify banned persons, sanctioned individuals, self-excluded players, vulnerable persons, and other prohibited participants. Attempted breaches are automatically logged and subject to review by the Compliance Department.

11.2 Enforcement Procedures

Where a prohibited person is identified, account access is restricted and gaming activity is blocked. Compliance personnel review the case and determine whether account suspension, permanent exclusion, or regulatory escalation is required. All actions and decisions are recorded within the audit trail and retained for regulatory inspection.

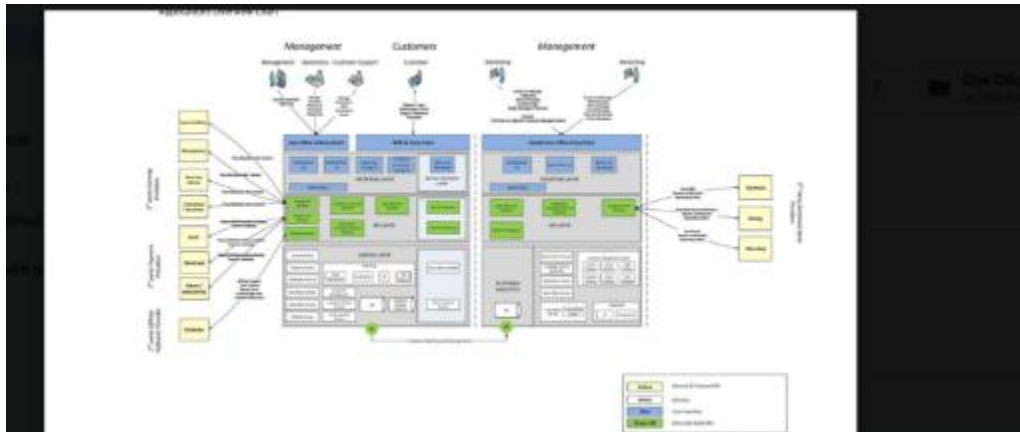

12 Technical Infrastructure and Disaster Recovery

Technical Architecture

The Operator maintains a documented architecture diagram showing:

- Frontend platform
- API layer
- Service layer
- Database environment
- Mirror database
- Third-party integrations
- Payment providers

- Gaming providers
- Back-office systems

Recovery Arrangements

Recovery measures include:

- Real-time database replication
- Daily backups
- Mirrored databases
- Disaster recovery environments
- Automated game state reconciliation

Players are informed of service interruptions through website messages and email notifications.

12.1 Backup and Recovery Procedures

The Operator maintains continuous database replication and daily full backups of critical operational systems. Mirrored databases and disaster recovery environments are maintained to ensure business continuity in the event of disruption.

12.2 Recovery Responsibilities

The Operator's DevOps team is responsible for initiating and managing recovery activities during technical emergencies. Recovery procedures are governed by the Business Continuity and Disaster Recovery Plan and include system restoration, failover activation, integrity verification, and return-to-service validation.

12.3 Reconciliation Following Recovery

Following restoration of services, unfinished games are reconciled using API communications with the relevant gaming provider. Pending wagers, deposits, withdrawals, and player balances

are reconciled against the last confirmed transaction state available prior to the interruption. Players are informed of material outages through website notifications and email communications.

The technical infrastructure supporting these processes is documented in the system architecture diagram.

13 Responsible Gaming

The Operator maintains a Responsible Gaming Policy and Responsible Gaming Section on its websites.

Available tools include:

- Deposit limits
- Cooling-off periods
- Self-exclusion
- Betting history access
- Self-assessment tools
- Reality checks
- Session controls

The Operator actively monitors player behavior to identify indicators of gambling harm and apply interventions where appropriate. Staff receive responsible gaming training, and all interactions are recorded on the platform.

13.1 Responsible Gaming Framework

The Operator maintains a Responsible Gaming Policy designed to promote responsible participation in gambling activities, prevent gambling-related harm, protect vulnerable persons, and ensure compliance with Articles 2.2(3), 5.4, and 5.6 of the National Ordinance on Games of Chance.

13.2 Responsible Gaming Tools

The following tools are available to players:

- Deposit limits
- Loss limits
- Stake limits
- Session limits
- Cooling-off periods
- Self-exclusion

- Betting history access
- Self-assessment tools
- Reality checks
- Session reminders

Players may set daily, weekly, or monthly deposit limits. Requests to decrease limits are effective immediately. Requests to increase limits are subject to a mandatory twenty-four (24) hour waiting period.

Cooling-off options include:

- 24 hours
- 7 days
- 1 month
- 3 months

Self-exclusion options include:

- 1 year
- 3 years
- 5 years
- 10 years
- Lifetime

13.3 Player Monitoring

The Operator conducts behavioural monitoring using system alerts, transaction monitoring, customer interactions, and account activity reviews. Indicators include:

- Sudden increases in deposits
- Excessive wagering activity
- Withdrawal reversals
- Extended gaming sessions
- Multiple account attempts
- Frequent changes to responsible gaming limits
- Aggressive or distressed customer communications

13.4 Responsible Gaming Intervention

Where risky behaviour is identified, interventions may include:

- Responsible gaming communications
- Information regarding support services
- Deposit restrictions

- Temporary account suspension
- Mandatory limits
- Self-exclusion recommendations
- Permanent exclusion where warranted

13.5 Vulnerable Person Protection

The Operator prohibits participation by minors, self-excluded persons, banned persons, persons with insufficient control over gambling behaviour, and other vulnerable persons. Additional due diligence and intervention measures are applied whenever vulnerability indicators are identified.

13.6 Staff Training

Responsible Gaming training is provided to customer support, compliance, VIP, marketing, and management staff. Training includes:

- Recognition of gambling harm
- Intervention procedures
- Responsible gaming tools
- Escalation requirements
- Documentation procedures
- Vulnerable player protection requirement

14 Terms and Conditions

The current Terms and Conditions are maintained as a separate annex to this Operations Manual.

The Compliance Team reviews and approves all updates. Player acceptance is recorded electronically within the Player Account Management system.

15 Dispute Resolution and Complaints Handling

Complaint Submission

Players may submit complaints through:

- Customer Support
- Email
- Live Chat
- Official Complaint Submission Form

Resolution Timelines

- Responsible Gaming Complaints:
 - Acknowledged within 2 business days
 - Target resolution within 5 business days
- Other Complaints:
 - Acknowledged within 1 week
 - Resolution within 4 weeks

ADR Escalation

Unresolved disputes may be escalated to:

EGIS – FZCO (CGA-approved ADR Provider)

15.1 Complaint and Dispute Definitions

A complaint is any written expression of dissatisfaction submitted by a player regarding the Operator's services, products, transactions, decisions, or conduct. A dispute is a complaint that remains unresolved following completion of the Operator's internal complaint process.

15.2 Complaint Escalation Process

Complaints are initially handled by Customer Support and may be escalated to Payments, Compliance, Responsible Gaming, Technical Support, Legal, or Management depending on subject matter. Responsible Gaming complaints receive priority handling.

15.3 Complaint Register

The Operator maintains a Complaint Register containing:

- Complaint reference number
- Player details
- Complaint category
- Supporting documents
- Investigation actions
- Decision and outcome
- Escalation history
- ADR referrals
- Closure date

16 Digital Records

The Operator maintains complete digital records covering:

Player Information

- Registration data
- Identity verification records
- Self-exclusion status
- Responsible gaming limits
- Player communications
- Verification documents
- Account amendments and changes
- Risk indicators
- Responsible gaming interactions
- Complaints

Gaming Transactions

- Bets
- Stakes
- Wagers
- Game rounds
- Odds
- Outcomes
- Wins
- Losses
- Refunds
- Cancellations
- Bonuses
- Jackpot activity
- Sessions history
- Transaction identifiers
- Balance impacts

Financial Transactions

- Deposits
- Withdrawals
- Chargebacks
- Reversals
- Payment failures

- Currency conversions
- Crypto transactions
- Payment provider references
- Approval histories
- Manual adjustments
- Bonus adjustments
- Refunds
- Reconciliation records

All records are retained for five years and are searchable, exportable, and auditable through the back-office system.

17 Availability of Records to the CGA

The Operator ensures that all required records remain continuously accessible and available for immediate export upon request by the Curaçao Gaming Authority. Records are maintained in formats that are complete, readable, searchable, exportable, and auditable.

The Managing Director is responsible for overseeing responses to CGA information requests. Access logs, audit trails, mirrored records, and backup copies remain available during failover events and disaster recovery scenarios.

If the primary environment becomes unavailable, access to records is maintained through mirrored databases and backup systems in accordance with the Operator's Business Continuity and Disaster Recovery Plan.

18 Server and Data Center Requirements

Critical records include:

- Player records
- Gaming transaction records
- Financial transaction records

These records are stored within AWS infrastructure and supported by mirrored databases and backup systems. Access controls include RBAC, 2FA, encryption, audit trails, monitoring, and disaster recovery procedures. Certain Tier-IV and Curaçao registration details remain to be confirmed and evidenced through supporting documentation.

Article 5.9 Compliance Matrix

The following matrix maps the requirements of LOK Article 5.9, paragraph 1(a)–(j), to the corresponding sections of this Operations Manual and identifies supporting evidence, compliance status, and any remediation required before submission to the Curaçao Gaming Authority.

Article 5.9 Requirement	Manual Reference	Evidence / Annex	Status	Action Required
a) Description of Games of Chance offered, payment possibilities, bet amounts, payouts, software, and outcome-determining elements.	Sections 2, 3, 4, 5, 6 and 7.	Games Register; Supplier Register; RNG and Testing Certificates.	Mostly compliant.	Ensure the Games Register is complete, current, and includes approved game titles, providers, bet limits, RTP/odds information, and outcome mechanisms.
b) Description of periodically used test methods for quality monitoring.	Section 8.	QA records; release testing logs; vulnerability assessment reports; disaster recovery test evidence; RNG and testing certificates.	Mostly compliant.	Add testing frequency, responsible owner, evidence retention location, and escalation process for failed tests or corrective actions.
c) Way of storing players' personal data and other details.	Section 9.	Data protection policy; access control records; retention schedule; security architecture records.	Mostly compliant.	Specify storage locations, systems of record, encryption standards, backup locations, access approval process, and retention/legal basis.
d) Description of visual elements shown to players through the gaming website or software application.	Section 10.	Website screenshots; mobile screenshots; UI inventory; responsible gaming notices;	Partially compliant.	Attach screenshots or a version-controlled UI inventory covering homepage, registration, login, account, payment, game, promotion, complaint,

		CGA seal display evidence.		responsible gaming, and footer/license displays.
e) Technical measures preventing admission of natural persons banned under National Ordinance from playing Games of Chance.	Section 11.	KYC/AML procedures; iDenfy screening records; self-exclusion controls; geolocation controls; sanctions screening logs.	Mostly compliant.	Identify the specific exclusion/banned-person data sources used, screening timing, match-handling workflow, account-blocking process, and audit trail evidence.
f) Diagram of technical infrastructure and description of restoration possibilities in a technical emergency.	Section 12.	Technical Infrastructure Diagram; Business Continuity and Disaster Recovery Plan; backup and failover test records.	Partially compliant.	Insert or attach the actual infrastructure diagram and add recovery time objectives, recovery point objectives, failover responsibilities, and DR testing frequency.
g) Description of implementation of responsible gaming principles, subject to Article 2.2(3), Article 5.4, and Article 5.6.	Section 13.	Responsible Gaming Policy; training records; player interaction logs; limit-setting and self-exclusion records.	Mostly compliant.	Add explicit cross-references to Article 2.2(3), Article 5.4, and Article 5.6, and describe how each responsible gaming obligation is operationalized and evidenced.
h) Most recent text of the general terms and conditions used by the operation.	Section 14.	Annex 6 – Slots99 Terms and Conditions, Version 1.0, Last Updated 09.07.2026, Effective Date 09.07.2026; version history; approval record; player	Compliant, subject to inclusion of Annex 6 and confirmation that the attached Terms and Conditions are the latest	Maintain Annex 6 with the full latest Terms and Conditions, version number, last updated date, effective date, approval record, and evidence that player acceptance is logged

		acceptance logs.	approved version.	electronically in the Player Account Management system.
i) Description of how the licensee settles disputes with players, subject to Article 5.3.	Section 15.	Complaints procedure; complaint logs; ADR escalation process; EGIS-FZCO documentation.	Mostly compliant.	Confirm Article 5.3 alignment, include complaint escalation stages, evidence retention, decision communication process, and ADR referral trigger points.
j) Digital records kept of critical player information, gaming transactions, and financial transactions, available to the CGA at all times on a server of a Tier-IV certified data center registered in Curaçao.	Sections 16, 17 and 18.	Data Center Certification and Registration Evidence; record inventory; back-office access procedures; backup and mirror database evidence.	Key gap / not yet fully compliant.	Confirm and evidence that the required critical records are available to the CGA at all times on a server of a Tier-IV certified data center registered in Curaçao. Update Section 18 once certification, registration, server location, access model, and continuity evidence are confirmed.

	Question	Answer
Games of Chance offered (Games Register)	1. Which games are offered to players (casino games, sports betting, live casino, lotteries, bingo, poker, fantasy sports, crash games, or another category)?	Casino, Live casino, and Crash games. Fully described in the attached Games Register.
	2. For each game type, what are the basic rules of play?	The rules of play for each game are provided in-game, displayed to the player once the game is opened on the site. Separately, the Terms and Conditions set out the general rules governing use of the site.
	3. Are any games supplied by third-party providers?	Yes (see attached supporting files / Suppliers Register).
	4. Which game providers are used?	(see attached Games Register for the full list of providers).

	5. Are any games restricted to specific jurisdictions or player categories?	Yes. Game providers apply their own jurisdictional restrictions, blocking access from the countries listed below for each provider: Evolution (Live Games & Slots, via EM): Afghanistan, Australia, Bulgaria, Burkina Faso, Cameroon, Canada, Croatia, Cuba, Congo, Guam, Haiti, Iran, Jamaica, Kenya, Latvia, Mali, Mexico, Mozambique, Myanmar, Namibia, Nigeria, North Korea, Northern Mariana Islands, Panama, Philippines, Puerto Rico, Senegal, Sudan, Syria, Taiwan, Venezuela, Vietnam, Virgin Islands, Yemen. Spinomenal (Direct): Afghanistan, Ethiopia, Guyana, Iran, Iraq, Pakistan, Sri Lanka, Syrian Arab Republic, Trinidad and Tobago, Uganda, Vanuatu, Yemen, United States, Israel, Australia, United Kingdom, Peru, Moldova. Habanero (Direct): Argentina (City of Buenos Aires), Belarus, Belgium, Brazil, Bulgaria, Colombia, Croatia, Denmark, Estonia, Georgia, Gibraltar, Greece, Germany, Hungary, Isle of Man, Italy, Latvia, Lithuania, Malta, Netherlands, Panama, Peru, Philippines, Portugal, Romania, Spain, Sweden, Afghanistan, Australia, Canada (Ontario, Alberta), Central African Republic, Cuba, Curaçao, Cyprus, Democratic Republic of Congo, Eritrea, France, Guinea-Bissau, Hong Kong, Iran, Iraq, Lebanon, Libya, Mali, Moldova, Myanmar, North Korea, Singapore, Somalia, South Africa, South Sudan, Sudan, Syria, Taiwan, United Kingdom, United States, Yemen. 		Playson (Direct): Afghanistan, Guinea Bissau, Haiti, Iran, Iraq, Jamaica, Lebanon, Libya, Myanmar, Nicaragua, North Korea, Pakistan, Panama, Philippines, Somalia, South Sudan, Syria, Turkey, Venezuela, Yemen, Zimbabwe, Australia, Belgium, Bulgaria, Croatia, Czech Republic, Denmark, Georgia, Germany, Greece, Israel, Italy, Malta, Netherlands, Portugal, Romania, Serbia, Spain, Sweden, Switzerland, Ukraine, United Kingdom, United States of America.
	6. How does the operator ensure that only approved or permitted games are made available?	The Operator applies IP-based restriction mechanisms per game provider and filters/hides game content shown to players based on the restricted-country lists supplied by each casino vendor (as set out above).
Payment possibilities	7. Which deposit methods are accepted?	Credit/debit cards, open banking, and crypto.
	8. Which withdrawal methods are available?	Verified credit/debit cards and open banking bank accounts.
	9. Are fiat currencies, crypto-assets, vouchers, e-wallets, bank cards, bank transfers, or alternative payment methods used?	Yes. The Operator uses fiat currencies (via bank cards and open banking/bank transfers) and crypto-assets. Vouchers and e-wallets are not used.
	10. Which payment service providers are involved?	Nuvei, Yugo, Interac, and Coinspaid (also see attached Suppliers Register).
	11. Are there minimum and maximum deposit and withdrawal limits?	Yes. Minimum and maximum deposit and withdrawal limits are displayed on the site per payment method.

	12. Are payment methods subject to verification before use?	Yes. Payment methods are verified at the thresholds prescribed by the CGA, with strict verification required before a withdrawal is processed.
	13. Are deposits and withdrawals only permitted through accounts held in the player's own name?	Yes. Deposits and withdrawals are only permitted through payment accounts held in the player's own name.
	14. How are failed, reversed, or suspicious payments handled?	The Operator verifies the payment method used and applies KYC checks, together with AML screening of any suspicious transactions.
Bet amounts	15. What are the minimum and maximum bet amounts per game?	Minimum and maximum bet amounts are a function of the maximum exposure set by the respective game provider.
	16. Are limits different per game, provider, player category, or jurisdiction?	Yes, limits differ per game provider.
	17. Are stake limits configurable by the player?	Yes. Responsible gaming limits are available in the player's customer profile, allowing the player to control their own gameplay.
	18. Are internal risk limits applied by the operator?	Yes. The Operator runs an anti-fraud engine covering 35 fraud detection rules, including detection of shared logins and payment methods, shared personal details, financial thresholds, number of payment methods used per account, mismatches between registered country, login country, and payment method country, device fingerprinting, and other risk indicators.
	19. Are responsible gaming limits applied to deposits, stakes, losses, or session activity?	Yes, to deposits, stakes, losses, and session length.

	20. How are changes to betting limits approved and recorded?	Requests to decrease deposit or stake limits take effect immediately. Requests to increase those limits are subject to a 24-hour waiting period before taking effect. All changes are recorded in the audit trail of the player's customer profile.
Payouts and winnings	21. What payout percentages, odds, prize structures, or return-to-player rates apply?	All RTPs, odds, and prize structures are publicly available on the site under each promotional activity offered to players.
	22. Are payout rules displayed to players before participation?	Yes. Payout rules form part of the game description and part of the terms and conditions of each promotion on the site.
	23. How are winnings credited to player accounts?	Winnings are credited to either the player's real money balance or bonus balance. Winnings credited to the bonus balance may carry wagering requirements that must be met before those funds convert to real money.
	24. Are jackpot, bonus, tournament, or promotional payouts handled differently?	Yes. Each promotional activity (jackpot, bonus, tournament, etc.) has its own payout rules, which are publicly available on the site under that activity.
	25. Are there maximum payout limits?	Yes. Maximum payout limits are determined by the game providers based on their maximum exposure and bet limits.
	26. What happens if a game, system, or payment error affects a payout?	The Operator requests a report from the relevant game vendor in order to investigate the cause and determine the appropriate resolution.
	27. How are disputed payouts investigated?	Disputed payouts are resolved based on the findings of the investigation (including any report obtained from the game vendor) and the applicable rules of the game.
Sof	28. What platform software is used?	Dench eGaming Solutions is used as the player account management (PAM) system.

	29. Which game aggregation, wallet, payment, KYC, AML, fraud monitoring, reporting, responsible gaming, CRM, and back-office systems are used?	Game aggregation: EveryMatrix. Wallet/transactions: Dench. Payments: Nuvei, Interac, Yugo, Coinspaid. KYC/AML: iDenfy. Fraud monitoring: Dench (in-house anti-fraud engine). Reporting: Dench. Responsible gaming: Dench. CRM: Dench. Back-office: Dench.
	30. Are systems proprietary or supplied by third parties?	The Dench platform (PAM, wallet, CRM, back-office, responsible gaming, fraud monitoring, reporting) is a proprietary in-house system. Payments, AML/KYC, and gameplay (game aggregation/providers) are supplied by third parties.
	31. Who maintains and updates the software?	The Dench platform is maintained and updated by the Operator's internal development team. Third-party systems (payments, KYC/AML, game providers) are maintained and updated by their respective third-party suppliers.
	32. How are software changes tested before release?	Changes to the in-house Dench platform are tested by the internal development/QA team in a staging environment before release to production. Changes to third-party systems are tested by the quality assurance teams of the respective third-party suppliers.
	33. How are software versions documented?	Changes to the in-house Dench platform are tracked through a version control system with tagged releases and internal release notes/changelog. Each third-party provider keeps its own record of the software version deployed and issues full release notes describing what has changed.
	34. How are access rights to software systems controlled?	Access to the in-house Dench platform is controlled through role-based access control (RBAC), with staff assigned dedicated user roles and permission levels appropriate to their job function. Access to third-party systems is controlled through dedicated user roles provided by each third party upon signing the contract.

Outcome-determining elements	35. Are outcomes determined by random number generators, live dealer results, sports results, player decisions, algorithms, or other mechanisms?	Casino game outcomes are determined by a certified RNG. Live casino outcomes are determined by live dealer/physical results. Crash game outcomes are determined by a certified RNG/algorithm. All RNGs are certified by the respective third-party game providers, and certificates are available upon request.
	36. Which systems or providers determine outcomes?	Live casino outcomes: Evolution. Slots/crash game outcomes: Spinomenal, Habanero, Pragmatic Play, Microgaming, Hacksaw, Endorphina, Redrake, Skywind, Wazdan, Slotmatrix-Fantasma, and Playson (see attached Games Register for the full mapping of games to providers).
	37. How is randomness tested and certified?	Randomness is tested and certified by independent testing laboratories engaged by each game provider.
	38. Are RNG certificates available?	Yes, RNG certificates are available upon request from the third-party game providers.
	39. How are game rules, payables, odds, and outcome logic documented?	Game rules, payables, odds, and outcome logic are documented within the game itself and displayed to the player when the game is opened.
	40. How does the operator prevent manipulation of outcomes? How are incidents involving incorrect game outcomes handled?	The Operator prevents manipulation of outcomes by only offering games from providers whose RNGs and systems are independently tested and certified, under contractual obligations requiring providers to maintain the integrity of game outcomes. Where an incident involving an incorrect game outcome is reported, the Operator demands an investigation report from the relevant third-party provider and resolves the matter based on its findings.
Per	41. Which systems are tested periodically?	All systems (in-house Dench platform and third-party systems) are tested prior to releasing any new version to the production environment.

	42. Are RNG tests, penetration tests, vulnerability scans, game certification tests, payment tests, load tests, disaster recovery tests, responsible gaming control tests, AML control tests, or data integrity tests performed?	Yes. These tests are performed by the respective third-party provider responsible for each system.
	43. How often are tests conducted?	Before each release cycle.
	44. Who performs the tests: internal staff, external auditors, labs, suppliers, or consultants?	Testing of the in-house Dench platform is performed by the Operator's internal development/QA staff. Testing of third-party systems (games, RNG, etc.) is performed by independent gaming testing laboratories engaged by the respective third parties.
	45. How are test results documented?	Third-party test results are reflected in the game/test report issued by the respective independent testing laboratory. Internal Dench test results are documented in internal QA test reports and tracked through the team's ticketing/test management system.
	46. How are deficiencies corrected?	Identified deficiencies are remediated and then verified by conducting a new (follow-up) test to confirm the issue has been resolved before release.
	47. Who verifies that corrective actions have been completed?	For third-party systems, the independent gaming testing laboratory verifies completion of corrective actions. For the in-house Dench platform, the internal QA/development team lead verifies and signs off on completed fixes before release.
Sto	48. What personal data is collected from players?	Name, address, sex, and date of birth.

	49. What identification, verification, contact, financial, gaming, technical, and communication data is stored?	Identification/verification: national ID and passport documents. Contact: email address and phone number. Financial: masked financial/payment data provided by the payment providers. Gaming: full gameplay data. Technical: IP address and device fingerprint (used for the anti-fraud engine).
	50. Where is the data stored? Which systems or databases contain player data?	Player data is stored in the database of the player account management (PAM) system, Dench (see the Server and data center requirement section for hosting/location details).
	51. Who has access to the data?	Only approved personnel of the Operator, based on their role and job function.
	52. How is access controlled and logged?	Access is controlled through role-based access control (RBAC) on the Dench platform, and all access to player data is logged in the platform's audit trail.
	53. How is data encrypted or otherwise protected?	Player data is protected by username and password access control (with RBAC, as described above), together with encryption at rest (database-level encryption) and in transit (TLS/HTTPS).
	54. What retention periods apply?	Player data is retained for 5 years, as prescribed by the CGA.
	55. How are data correction, deletion, or access requests handled?	Players submit data correction, deletion, or access requests via customer support. Requests are reviewed and actioned by the Compliance/Data Protection function, with a target response timeframe of 30 days. Every action taken is recorded in the back-office audit trail.
	56. How is data protected against unauthorized access, loss, alteration, or disclosure?	Access to the platform is protected by two-factor authentication (2FA), in addition to the role-based access control, encryption (at rest and in transit), and audit trail logging described above. Regular backups protect against data loss (see the Restoration possibilities section for backup details).

Visual elements shown to players	57. What websites, domains, mobile applications, or software interfaces are used?	The websites slots99.io and grandelix.com. Both are responsive, mobile-optimized websites accessed via browser on desktop and mobile; there is no dedicated native mobile application.
	58. What branding, logos, license information, game pages, account screens, responsible gaming messages, warnings, pop-ups, banners, bonus displays, payment screens, terms links, complaints information, and footer information are shown?	Both sites display the Operator's branding and logos, license information, individual game pages, player account/dashboard screens, responsible gaming messages and warnings, promotional banners and pop-ups, bonus displays, payment method screens, links to the Terms and Conditions, and complaints/contact information. The footer includes a clear visual indication that gambling by minors is prohibited, the Operator's license details, the CGA digital seal, a link to the Responsible Gaming Section, and links to gambling addiction support resources (as described in the Responsible Gaming section above).
	59. Are visual elements consistent across desktop and mobile versions?	Yes.
	60. Are legally required notices clearly visible?	Yes. Legally required notices are clearly visible on the sites, in both the footer and the deposit page.
	61. Are game rules, risks, odds, limits, and responsible gaming tools easy to find?	Yes. Game rules, risks, odds, and limits are displayed within each game upon opening it, and responsible gaming tools are easily accessible via the Responsible Gaming Section described above.

	62. How are changes to visual elements reviewed and approved?	Changes to visual elements are reviewed and approved by the Operator's internal design team.
Technical measures to prevent banned persons from playing	63. Which categories of banned or prohibited persons are blocked?	Minors, self-excluded or banned persons (whether banned by force or at their own request), persons who have insufficient control over their gambling behaviour, persons declared bankrupt, and persons identified through AML sanctions/watchlist screening. No login is permitted for any banned or prohibited person.
	64. How does the operator identify banned persons during registration, login, deposit, or gameplay?	The Operator uses the iDenfy AML screening service to identify banned or prohibited persons at registration, login, deposit, and during gameplay, in combination with the age verification checks described in the Responsible Gaming section and the internal self-exclusion register.
	65. Are exclusion lists, self-exclusion databases, age verification systems, sanctions checks, duplicate account checks, geolocation tools, identity verification tools, or device/IP checks used?	Yes. These checks are performed through a combination of the Operator's internal anti-fraud engine (self-exclusion register, duplicate account checks, device/IP checks, geolocation) and the AML/identity/sanctions screening service provided by iDenfy.
	66. How often are checks performed?	Checks are performed at registration, at every login, and at every deposit and withdrawal.
	67. What happens if a banned person attempts to register or play?	The Operator does not offer services to banned or sanctioned individuals; registration or play is blocked as soon as the person is identified as banned or sanctioned through the checks described above.

	68. Are accounts suspended automatically or manually?	Accounts are suspended manually.
	69. How are attempted breaches recorded and reported internally?	Attempted breaches are recorded in the platform's audit trail and reviewed internally by the Compliance function.
Technical infrastructure diagram	70. Does the manual include a clear diagram of the platform architecture?	Yes, a platform architecture diagram is attached as an annex to this manual (see attached Technical Infrastructure Diagram).
	71. Does the diagram show hosting, servers, databases, payment systems, game providers, platform providers, firewalls, APIs, back-office systems, monitoring tools, data centers, backup systems, and third-party integrations?	The attached Applications Overview Chart shows the frontend, API, and service layers, back-office systems, the database and its mirror/disaster recovery database, and third-party integrations (gaming providers, payment providers, affiliate software provider, and communication providers). Physical hosting, server, data center, and firewall details are not shown on this application-architecture diagram; they are addressed in the Server and data center requirement section of this manual.
	72. Does it identify which systems are critical to the operation?	No, the diagram does not currently label which systems are critical to the operation.
	73. Does it show where player data, transaction data, and gaming data are stored?	Yes. The diagram shows player, transaction, and gaming data stored in the platform database, with the flow of Customer Data/Payment/Gaming Activity indicated between the database and its mirror.

	74. Does it show data flows between systems?	Yes. The diagram shows data flows via labeled connections between the frontend, API, and service layers, the database, and third-party integrations.
	75. Does it identify system owners or responsible parties?	Yes. The diagram identifies the responsible functions/parties (Management, Operations, Customer Support, Marketing) associated with each entry point and system area.
Restoration possibilities in technical emergencies	76. What types of emergency situations are covered?	Emergency situations are addressed through a failover recovery mechanism (see the specific scenarios listed in question 77 below).
	77. Are server failure, cyberattack, data loss, payment outage, game provider outage, platform outage, network failure, database corruption, and disaster recovery scenarios addressed?	Yes. These scenarios are addressed in the Operator's separate Business Continuity and Disaster Recovery Plan (see attached).
	78. What backup procedures are in place?	Backup procedures are set out in the Operator's Business Continuity and Disaster Recovery Plan (see attached).
	79. How often are backups made?	Backups are made on an ongoing, continuous basis (real-time replication), with a full backup taken daily.
	80. Where are backups stored?	See the Operator's Business Continuity and Disaster Recovery Plan (see attached).
	81. What recovery time objectives and recovery point objectives apply?	RTO and RPO are set out in the Operator's Business Continuity and Disaster Recovery Plan (see attached).
	82. Who is responsible for activating recovery procedures?	The Operator's internal DevOps team is responsible for activating recovery procedures.

	83. How are players informed during service interruptions?	Players are informed via on-site pop-up messages and email.
	84. How are unfinished games, pending bets, deposits, withdrawals, and balances handled after restoration?	Unfinished games are resolved automatically via API, calling back the relevant game provider to retrieve the final outcome. Pending bets, deposits, withdrawals, and balances are reconciled against the last confirmed state recorded before the interruption, in accordance with the Business Continuity and Disaster Recovery Plan.
Responsible gaming implementation	85. What responsible gaming policy applies?	The Operator's Responsible Gaming Policy applies, and is referenced in the footer of the site (see attached Responsible Gaming Policy).
	86. How are players informed about responsible gaming risks?	The Operator informs players about responsible gaming risks through a clearly identifiable and easily accessible Responsible Gaming Section on the website and/or application. The Responsible Gaming Section provides clear and understandable information enabling players to make informed decisions about their gambling behaviour. It includes information on gambling-related risks, signs of problematic gambling, the prohibition of underage gambling, available responsible gaming tools, and how players may contact the Operator regarding responsible gaming concerns by email or chat. A clear and visible link to the Responsible Gaming Section is displayed on the homepage and in the footer of the website or application. The Responsible Gaming Section is also referenced in the Terms and Conditions, which are accessible no more than one click away from the homepage. The information is made available in English and in the language of the Operator's target market, with the English version prevailing in case of discrepancy. The footer of the website or application includes a clear visual indication that gambling by minors is prohibited, the Operator's license details, the CGA digital seal, a link to the Responsible Gaming Section, and links to gambling addiction support resources, including international and, where available, local support services.

	87. What tools are available to players, such as deposit limits, loss limits, wager limits, session limits, time-outs, reality checks, self-exclusion, account closure, and cooling-off periods?	The Operator makes responsible gaming tools available to players through the Responsible Gaming Section of the website or application. These tools include, at a minimum, deposit limits, cooling-off periods, self-exclusion, access to betting and wagering history, and player self-assessment resources. Players may set deposit limits for daily, weekly, or monthly periods. Once a deposit limit is reached, the player cannot make further deposits until the relevant period resets. Any request to make a deposit limit more restrictive takes effect immediately, while any request to make a limit less restrictive is subject to a 24-hour waiting period before implementation. Players may activate a cooling-off period of 24 hours, 7 days, 1 month, or 3 months. During a cooling-off period, the player is restricted from gambling activity in accordance with the selections made, while funds remain available for withdrawal. Players may also self-exclude for a period of 1 year, 3 years, 5 years, 10 years, or lifetime. Self-exclusion applies to all gambling activity and all brands or domains operated under the Operator's license. During self-exclusion, the player's account is closed, login is blocked, deposits and wagering are prohibited, and direct marketing is stopped. The Operator may also offer additional tools based on its risk profile, including loss limits, wager limits, time limits, session limits, player-activated reality checks, pop-up reminders, real-time session timers, and access to internet filtering tools.
--	---	--

	88. How does the operator detect risky or problematic gambling behavior?	The Operator operates behaviour tracking controls to identify signs of risky or problematic gambling behaviour. Monitoring is performed through a combination of system-based alerts, player account data, transactional monitoring, and observations by frontline staff such as customer support, VIP, and responsible gaming personnel. The Operator assesses risk holistically and does not rely on a single indicator alone unless the circumstances justify immediate action. Monitoring factors include sudden or unexplained increases in deposit or wagering frequency, repeated failed transactions due to insufficient funds, repeated withdrawal reversals, inexplicably extended play sessions, increased or agitated communication with customer support, frequent changes to responsible gaming tools, use of cooling-off periods, players maxing out credit cards, and attempts to open multiple accounts to bypass limits or exclusions. Where appropriate, the Operator may use platform features, in-game tools, automated alerts, artificial intelligence, machine learning, or manual review to support the detection of at-risk behaviour.
	89. Are player interactions documented?	All responsible gaming interactions are documented in the Player Account Management system or another designated internal system. This includes interactions initiated by the player and by the Operator. Records include the date and time of the interaction, the staff member or system involved, the indicator or concern identified, the information provided to the player, tools discussed or applied, any player response, escalation steps, account restrictions, temporary suspensions, exclusions, and follow-up actions. Operator-initiated exclusions are formally documented and retained for at least five years. Records are maintained so that they can be reviewed internally and made available to the CGA upon request where required.

	90. How are vulnerable players protected?	The Operator protects vulnerable players by implementing proactive responsible gaming controls designed to prevent and mitigate gambling-related harm. A vulnerable person includes a minor, a person who has insufficient control over gambling behaviour, a person banned from gambling by force or at their own request, and a person declared bankrupt. The Operator does not knowingly permit a person who can reasonably be assumed to be vulnerable to participate in games of chance. Where a player displays behaviour suggesting vulnerability or gambling-related harm, the Operator initiates appropriate responsible gaming intervention. This may include informing the player of available tools, directing the player to support resources, applying mandatory deposit limits, temporarily suspending the account, or excluding the player where the risk is severe or persistent. Marketing and advertising are not directed at vulnerable persons and must not portray gambling as a solution to financial, emotional, or mental difficulties. The Operator also ensures that bonuses or promotions are not used to encourage excessive gambling or to discourage the use of responsible gaming tools.
--	--	---

	91. How does the operator prevent minors and excluded persons from gambling?	The Operator prohibits any person under the age of 18 from registering, depositing, wagering, or otherwise participating in games of chance. During registration, the player must enter their date of birth and confirm that they are over 18 by selecting a designated checkbox. Additional checks are performed to obtain sufficient certainty that the player is not a minor. At a minimum, government-issued valid identification, such as a passport, national ID card, or driver's license, is verified upon reaching specified thresholds and in all cases before the first withdrawal. The Operator may also use secondary verification measures such as electronic verification systems, payment validation, government or third-party database checks, and selfie or liveness verification. If the Operator becomes aware that a player is a minor, the account is closed immediately, the reason for closure is communicated, and the civil law implications are considered, including potential refund of deposits and forfeiture of winnings. Records of age verification checks and outcomes are retained and made available for regulatory review.
--	---	--

	92. How are responsible gaming obligations under Articles 2.2(3), 5.4, and 5.6 of the LOK implemented operationally?	The Operator implements responsible gaming obligations operationally through a documented Responsible Gaming Policy, player-facing Responsible Gaming Section, responsible gaming tools, internal monitoring procedures, escalation protocols, and staff training. The Operator integrates responsible gaming principles into its business model and takes proactive steps to protect vulnerable persons, promote responsible gambling, and prevent or mitigate problem gambling behaviour. The Operator appoints a person responsible for responsible gaming tasks within the organization. Until a dedicated responsible gaming person is appointed, the Compliance Officer responsible for non-AML compliance performs this function. The responsible gaming function reports to management at least once every 12 months on the effectiveness of the policy and operational procedures and recommends any required enhancements. Material changes to the Responsible Gaming Policy are reported to the CGA. Operationally, the Operator ensures that players can access responsible gaming information, set deposit limits, activate cooling-off periods, self-exclude for at least one year, access self-assessment tools, and obtain support resources. The Operator also implements behaviour tracking and intervention procedures, prevents minors and excluded persons from gambling, trains relevant staff, and ensures that advertising and marketing comply with responsible gaming standards. The Operator provides responsible gaming training to relevant staff, including customer support, VIP, marketing, compliance, and responsible gaming personnel. Training covers recognition of gambling distress, signs of problematic gambling, handling sensitive player conversations, escalation of responsible gaming concerns, use of responsible gaming tools, directing players to support resources, preventing marketing to vulnerable players, and documenting responsible gaming interactions. Staff who interact with players are trained to respond professionally, neutrally, and without encouraging continued play where responsible gaming concerns exist.
--	---	--

		The Operator ensures that marketing and advertising comply with responsible gaming standards. Marketing does not knowingly or deliberately target vulnerable persons, minors, self-excluded players, or persons showing indicators of problematic gambling. Advertising does not portray gambling as an investment, a route to financial success, a solution to financial or emotional difficulties, or a substitute for well-being. Marketing does not misrepresent the role of chance, does not suggest that skill can influence purely chance-based games, and does not include minors, explicit content, or links between gambling and harmful behaviours. Bonuses and promotions are communicated transparently with clear terms and conditions and are not used to encourage excessive gambling. All advertising includes a clearly visible responsible gaming message or slogan. Affiliates, influencers, ambassadors, representatives, and other third parties involved in marketing are informed of the Operator's Responsible Gaming Policy and are required to comply with it.
General Terms and Conditions	93. What is the current version number and date of the Terms and Conditions?	<i>[version/date on file — to be inserted once confirmed]</i>
	94. Are the Terms and Conditions included in full or attached as an annex?	The Terms and Conditions are attached as a separate annex to this manual.
	95. Do they match the version published on the website or application?	Yes.
	96. How are updates to the Terms and Conditions approved?	Updates to the Terms and Conditions are reviewed and approved by the Compliance Team.
	97. How are players notified of material changes?	Players are notified of material changes to the Terms and Conditions via email and a banner/pop-up notice on the site ahead of the change taking effect.

	98. How is player acceptance recorded?	Player acceptance of the Terms and Conditions is marked and recorded in the player's customer profile.
	99. Do the Terms and Conditions cover eligibility, account registration, deposits, withdrawals, bonuses, gameplay rules, responsible gaming, complaints, suspension, termination, data use, and governing law?	Yes, all of the above are covered in the Terms and Conditions.
	100. What qualifies as a complaint or dispute?	A complaint is any written expression of dissatisfaction submitted by a registered player regarding the Operator's services, decisions, terms, conduct, or any incident connected to the player's participation in games of chance, where the player expects a response or resolution. This includes, but is not limited to, complaints relating to deposits, withdrawals, bonus terms, account closures or restrictions, alleged game errors or unfair game outcomes, responsible gaming matters, treatment of player balances, KYC and verification, data protection, technical or software issues, AML concerns, minors, fraudulent games or practices, licensing or regulatory issues, and unfair terms and conditions. A dispute is a complaint that has not been resolved to the player's satisfaction through the Operator's internal complaints process and has been escalated internally, to an independent ADR provider, or to a court of law.
Dispute settlement with players		

	101. How can players submit complaints?	Players may submit complaints free of charge within six months from the settlement of the bet or the incident giving rise to the complaint. For peer-to-peer games, such as poker, and ante-post fixed odds betting, the six-month period starts from the settlement of the bet or conclusion of the relevant event, rather than the placement of the wager. Complaints may only be submitted by the registered player. Players may first contact customer support for assistance and may then submit an official complaint using the Operator's Complaint Submission Form. The form is available either as a downloadable form that can be completed and emailed or uploaded, and/or as an online form that can be completed and submitted through the website or player account.
	102. Which communication channels are available?	The Operator offers customer support through email and/or live chat. The Operator also makes an official Complaint Submission Form available to players. Where applicable, the form may be submitted online, uploaded through the player account or complaints page, or sent by email. Information on how to contact the Operator, how to access the Complaint Submission Form, and how to escalate unresolved complaints is included in the Terms and Conditions and made visible and accessible on the website, either as a standalone complaints link or document.
	103. What information must players provide?	The Complaint Submission Form requires, at a minimum, the player's name, address, place of residence, account number where applicable, the date of the complaint, the date of the disputed event, and a description of the conduct, decision, transaction, or event being disputed. The form may also include pre-determined complaint categories to assist classification and handling. The Operator may request supporting documents or additional information that are reasonably required to investigate and resolve the complaint. Any request for additional information must be proportionate and relevant to the complaint.

	104. What internal department handles complaints?	Complaints are handled by the Operator's Customer Support in the first instance. Complaints involving specific subject matter are escalated to the relevant internal department, such as Payments, Gaming Operations, KYC/Verification, AML/Compliance, Responsible Gaming, Technical Support, Legal, or Management. Responsible gaming complaints are prioritized and handled with appropriate involvement of trained Responsible Gaming or Compliance personnel.
	105. What are the timelines for acknowledgment, investigation, response, and escalation?	Responsible gaming complaints are treated as priority matters. Within two (2) business days of receiving a responsible gaming complaint, the Operator confirms receipt in writing, explains how the complaint will be processed, and provides the expected timeline for resolution. The Operator uses best efforts to resolve responsible gaming complaints within five (5) business days. If more time is required to make a reasonable and informed decision, the player is informed of the delay, which may not exceed two (2) weeks. If the delay is caused by lack of information or slow response from the player, the resolution period may be extended by no more than a further two (2) weeks. For all other complaints, the Operator confirms receipt in writing within one (1) week, explains how the complaint will be processed, and provides the average timeline for resolution. The Operator assesses and responds to such complaints within four (4) weeks. If necessary, due to complexity or lack of information, this period may be extended once by an additional four (4) weeks, provided the player is informed in writing before the original period expires. If the player is dissatisfied with the final outcome, the player is informed of the right to escalate the complaint to an independent ADR provider free of charge.

	106. How are complaint decisions documented?	The Operator documents all complaints and complaint decisions in a complaint register. Each record includes the player details, account number (where applicable), complaint date, disputed event date, complaint category, summary of the issue, supporting documents requested and received, internal departments involved, investigation steps, decision, outcome, response date, escalation history, and whether the complaint was upheld, rejected, settled, pending, unresolved, referred to ADR, or subject to legal action. The player always receives a final determination in writing. The written response includes either a reasoned final assessment of the complaint and outcome, with supporting evidence where necessary or applicable, or detailed reasons why the complaint is not being handled. Records of unresolved complaints and complaints escalated to ADR or legal proceedings are retained for the required period, and the CGA may request access to complaint and dispute records at any time.
--	---	--

	107. How are disputes regarding bets, winnings, payments, account closures, bonuses, responsible gaming, or verification handled?	Complaints and disputes are investigated according to their subject matter and escalated to the relevant internal department. Bet and game outcome disputes are reviewed against game logs, transaction records, game rules, provider records, settlement data, and any relevant technical evidence. Winnings and balance disputes are reviewed against the player wallet, game history, payout rules, bonus rules, and payment records. Deposit and withdrawal complaints are reviewed by Payments and Compliance against transaction references, payment provider records, AML/KYC status, withdrawal rules, and any relevant delays or restrictions. Account closure or restriction complaints are reviewed against the Terms and Conditions, account history, security records, responsible gaming records, AML/KYC findings, and compliance grounds for the action taken. Bonus complaints are reviewed against the applicable bonus terms, wagering requirements, eligibility criteria, communications, and player activity. Responsible gaming complaints are prioritized and reviewed by trained staff, particularly where the complaint concerns vulnerable players, self-exclusion, cooling-off, or the timely implementation of responsible gaming measures. KYC and verification complaints are reviewed against the Operator's verification requirements, documents submitted, requests for additional information, and any applicable legal or regulatory obligations. In all cases, the Operator provides a written, reasoned decision and does not use the complaints process to unfairly delay legitimate withdrawals or avoid valid obligations to the player.
	108. Are unresolved complaints escalated to a CGA-approved contracted ADR provider?	Yes. Unresolved complaints are escalated to EGIS – FZCO, a company incorporated in Dubai with trade licence number 22105, registered address at Unit 22105-001, IFZA Business Park, DDP, Dubai, United Arab Emirates (the "Provider"), the Operator's contracted CGA-approved ADR provider.

Digital records of player information	109. What specific player records are maintained?	The Operator maintains identity and registration data, verification records, account status, exclusion status, deposit/stake/loss/session limits, player communications, risk indicators, complaints (including the body of the complaint, date, and action taken), responsible gaming interactions, and account changes (see question 110).
	110. Are identity details, registration data, verification records, account status, exclusion status, limits, communications, risk indicators, complaints, responsible gaming interactions, and account changes retained?	Yes, all of the above are retained in the player's customer profile.
	111. Are records complete, accurate, searchable, and exportable?	Yes. Records are complete, accurate, searchable, and exportable via the back-office system.
	112. How long are records retained?	5 years, as prescribed by the CGA.
	113. Who can access or amend the records?	Only super-admin users of the back-office system can access or amend the records.
	114. Are audit trails maintained?	Yes, audit trails are maintained on the platform.

Digital records of gaming transactions	115. Are all bets, stakes, wagers, game rounds, odds, outcomes, wins, losses, cancellations, refunds, jackpots, bonuses used in gameplay, and game session details recorded?	Yes, all of the above are recorded.
	116. Do records identify the player, date, time, game, transaction ID, amount, currency, result, and balance impact?	Yes.
	117. Can records be reconstructed in case of dispute or regulatory inspection?	Yes.
	118. Are game provider records reconciled with platform records?	Yes.

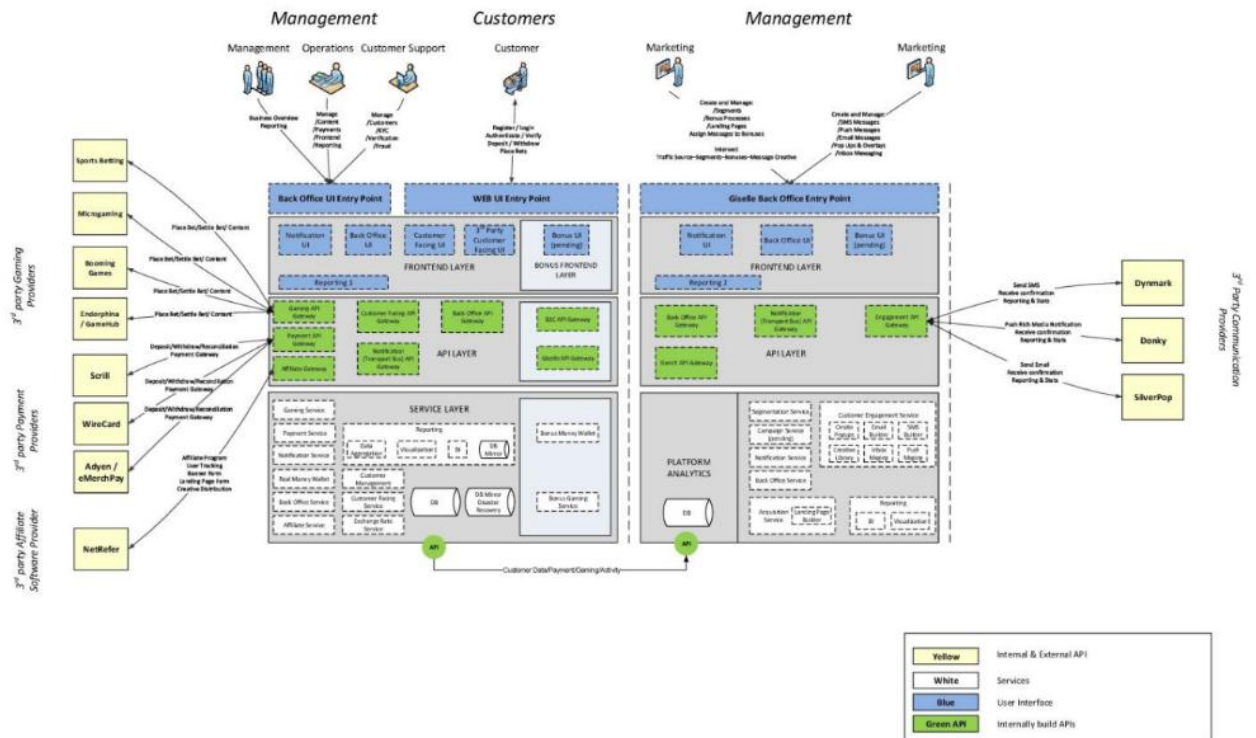

Digital records of financial transactions	119. Are deposits, withdrawals, reversals, chargebacks, payment failures, fees, currency conversions, crypto transactions, bonus credits, manual adjustments, and refunds recorded?	Yes, all of the above are recorded.
	120. Do records include date, time, amount, currency, payment method, payment provider, transaction reference, player account, status, and approval history?	Yes.
	121. Are financial records reconciled with payment service provider data and player wallet balances?	Yes.
	122. How are unusual transactions flagged?	Unusual transactions are flagged according to the respective anti-fraud detection rules (see question 18) and financial thresholds, together with the Operator's source-of-wealth mechanism applied upon deposit.

Availability of records to the CGA	123. Are the required records continuously accessible?	Yes, required records are continuously accessible via the back-office system.
	124. Can the CGA obtain records without delay when requested?	Yes.
	125. Are records stored in a format that is readable, complete, and exportable?	Yes.
	126. Who is responsible for responding to CGA requests?	The Managing Director has the primary access to the CGA portal, through which the CGA logs requests for information and documents
	127. Are access logs and audit trails available?	Yes.
	128. Are backup records also available?	Yes.
	129. What procedures apply if the primary system is unavailable?	If the primary system is unavailable, the Operator fails over to the mirrored database and backup systems described in the Business Continuity and Disaster Recovery Plan. Records remain accessible from the backup/mirror environment until the primary system is restored, in accordance with the RTO/RPO set out in that Plan.
Server and data	130. Which server stores the required critical records? Is the server located in a Tier-IV certified data center? Is the data center registered in Curaçao?	<i>Critical records are stored on AWS (Amazon Web Services) hosting infrastructure. [PLACEHOLDER — confirm specific AWS region/data center used, its Tier-IV certification status, and whether it is registered in Curaçao, or clarify with compliance/legal counsel whether a locally-registered mirror/backup satisfies the CGA's Curaçao data center requirement]</i>

	131. What evidence confirms the certification and registration?	<i>[PLACEHOLDER — attach the data center's Tier-IV certificate and Curaçao business/registration documentation once confirmed]</i>
	132. Which records are stored there?	All critical records described in this manual: player records, digital gaming transaction records, and digital financial transaction records.
	133. Are mirrored, backup, or replicated records also maintained?	Yes. Mirrored/backup records are maintained, consistent with the database mirror and disaster recovery system shown in the architecture diagram and the daily/continuous backups described in the Restoration possibilities section.
	134. Who manages the server?	The Operator's internal DevOps team manages the AWS server infrastructure.
	135. What security, access control, monitoring, and business continuity measures apply?	Security and access control measures include role-based access control (RBAC), two-factor authentication (2FA), and encryption at rest and in transit. Access is logged in the platform's audit trail. The Operator's internal DevOps team monitors the AWS infrastructure, and business continuity is supported by continuous/daily backups, a mirrored database, and the failover procedures set out in the Business Continuity and Disaster Recovery Plan.

Annex: Technical Infrastructure Diagram (Applications Overview Chart)

Applications Overview Chart

Supplier: Dench eGaming Solutions

No.: 1

Supplier / third-party name: Dench eGaming Solutions

Service category (see tab 2.): Platform provider

Description of service provided: Core gaming platform, player account management system, wallet system, back-office platform

System / product name: Dench Core

Criticality (see tab 3.): Critical

Data processed or accessed (see tab 4.): Data processed

Player data involved?: Yes

Financial transaction data involved?: Yes

Gaming transaction data involved?: Yes

Jurisdiction / country of supplier: Bulgaria

Hosting / data location (country / data center / cloud region): AWS

Contract in place?: Yes

Contract owner: Disrupt Entertainment Limited

Internal business owner: Yes

Compliance owner: Yes

Risk rating: Critical

Category	Examples of suppliers to include
Platform provider	Core gaming platform, player account management system, wallet system, back-office platform
Game provider	Slot providers, live casino providers, RNG table game providers, bingo providers, poker providers
Game aggregator	Aggregators connecting multiple game studios to the platform
Sportsbook provider	Sports betting platform, odds feed, trading services, bet settlement system
Payment service provider	Deposit and withdrawal providers, card processors, bank transfer providers, e-wallet providers, crypto payment processors
KYC / identity verification vendor	ID verification, document verification, age verification, liveness checks, address verification
AML / sanctions screening tool	Sanctions screening, PEP screening, adverse media, transaction monitoring
Fraud prevention tool	Device fingerprinting, IP intelligence, duplicate account detection, bonus abuse detection
Responsible gaming tool	Behaviour monitoring, player risk scoring, self-exclusion tools, limit management tools
Hosting provider	Cloud provider, data center, dedicated server provider, Tier-IV certified data center
Cybersecurity provider	Penetration testing, vulnerability scanning, DDoS protection, SIEM, SOC monitoring
Customer support system	Helpdesk platform, chat provider, email ticketing system, call center system
CRM / marketing platform	Player communications, promotional campaign tools, segmentation platforms
Analytics / reporting tool	BI tools, dashboards, regulatory reporting tools, data warehouse providers
Communication provider	SMS provider, email provider, push notification provider
Legal / compliance support provider	External compliance consultants, auditors, certification labs, test houses

Rating	When to use
Critical	Supplier is essential to core gaming operations, player wallet, payment processing, hosting, critical recordkeeping, compliance screening, or CGA record availability. Failure would materially disrupt the licensed operation.
High	Supplier processes sensitive data or supports an important operational function, but temporary failure may be manageable through alternatives or manual workarounds.
Medium	Supplier supports non-core functions or limited data processing, with moderate operational or compliance impact if unavailable.
Low	Supplier has limited access, limited operational relevance, or no direct impact on gaming, payments, player data, compliance, or regulatory reporting.

Data category	Examples of data to include
Player identity data	Full name, date of birth, nationality, residential address, email address, phone number, username, account ID, customer number
KYC / verification data	ID documents, passport, national ID, driver's license, selfie/liveness check, proof of address, verification status, age verification result
Player account data	Account status, registration date, login history, account settings, language, country, linked accounts, duplicate account indicators
Gaming transaction data	Bets, stakes, wagers, game rounds, game ID, session ID, odds, results, wins, losses, cancelled bets, voided bets, jackpots, tournament entries
Financial transaction data	Deposits, withdrawals, refunds, chargebacks, payment method, bank account or card reference, wallet address, payment provider reference, transaction status
Player wallet / balance data	Cash balance, bonus balance, locked balance, pending withdrawals, balance adjustments, currency, account ledger
Responsible gaming data	Deposit limits, loss limits, wager limits, session limits, cooling-off periods, self-exclusion status, reality checks, RG interactions, risk flags
AML / compliance data	Customer risk rating, sanctions screening result, PEP screening result, adverse media result, source of funds/source of wealth information, unusual transaction flags, investigation notes
Fraud and security data	IP address, device ID, browser fingerprint, geolocation data, VPN/proxy indicators, login attempts, failed authentication, fraud scores, bonus abuse indicators
Technical / system data	System logs, API logs, error logs, platform events, access logs, configuration data, monitoring alerts
Communication data	Emails, chat transcripts, support tickets, call notes, complaint correspondence, internal notes on player interactions
Marketing / CRM data	Player segment, campaign history, bonus eligibility, consent status, promotional preferences, communication preferences
Website / app usage data	Cookies, page views, clickstream data, session duration, device type, referral source, player journey data
Complaints and dispute data	Complaint details, dispute category, investigation records, evidence, decision, escalation history, outcome
Regulatory reporting data	Records or extracts prepared for CGA, FIU-related internal records, audit reports, compliance reports, inspection files
Supplier operational data	Service tickets, incident reports, SLA reports, maintenance records, uptime reports, change logs
Aggregated / anonymized data	Aggregated performance reports, anonymized analytics, statistical reports, non-identifiable transaction summaries
