

How we work

Our casino will support integration of the leading gaming providers and contain the most exciting and popular slots, poker, roulette, blackjack, bingo, etc. We will also offer a live casino with real dealers and live video streaming features.

Available languages

Our initial version of the website will support the following languages:

- English
- Russian
- Portuguese

Live chat and email support will be also offered in all the supported languages. With expansion into the new markets, our total amount of supported languages will increase with an aim to have a total of 20+ languages offered.

Main functionality

As an online casino, our site will allow users to register, deposit and withdraw funds, play games for real money and for fun, check their playing history in a profile page, participate in various tournaments or even become an affiliate.

Registration

Users can register via the following options:

- E-mail
- Social Networks
 - Google
 - Facebook
 - VK

All the registered users will be required to be at least 18 years old and from the supported list of countries.

Deposit and withdrawal

Our Payment System Provider partners will offer an easy and convenient way for the users to top up their balances. The final list of the providers has not yet been finalized, but will include the following ones:

- Credit cards
- Cryptocurrencies
- Payment aggregators (like Neteller)

The withdrawals will fall under specific T&C anti-fraud measures, allowing people only to withdraw to the same accounts they used for deposits.

Playing games

Our broad list of game providers with thousands of games offered will help any user to find a game he likes. A game will be opened in an iframe and user will be playing the game via game provider servers. The balance in the game and on the website will be working as a seamless wallet, meaning that it is synchronized between the casino and the game provider after each game round. As a result – the balance is always same within the game and on the website, providing better user experience and avoiding problems related to disconnected user sessions and similar issues.

Profile

A user could check his play history, transactions (deposits/withdrawals), bonuses, current loyalty system status and other information in his personal profile page. The main sections are the following:

- Personal information (name, country, etc.)
- Balances (in all the supported currencies)
- Transactions
- Gaming history
- Bonus balance and history
- Affiliate information
- Uploaded documents (for KYC purpose)
- Personal gaming limits (as a part of responsible gaming system)

Participating in tournaments

The casino will offer a variety of daily/weekly tournaments as well as special promoting events. Any user could join and play casino games from the supported list for the specific tournament. The users on top of the leaderboard by the end of the event will be awarded with various prizes, like complimentary points, bonus balance, freespins, etc.

Becoming an affiliate

Our integration of a 3rd party affiliate system will allow users to benefit from all the features and bonuses when bringing new traffic to the casino. A user will have to fill additional information required for an affiliate profile and could track and analyze the new leads he brought to the website.

List of the info pages

Besides the main pages of the casino where a user will be spending most of the time playing the games, we provide all the required information about our product and service as well as promotional and other specific data. The pages are including, but not limited to:

- Terms & Conditions
- Privacy policy
- Bonus T&C
- Responsible gaming
- About us
- Banking
- Support
